AIAA JOURNAL
Volume 33, No. 12, December 1995

1995 *AIAA Journal* Index

How to Use the Index

In the Subject Index, pages 2451–2462, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 2463–2465, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2466–2479, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1995, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 2480, lists the books reviewed during 1995, the author, publisher, reviewer, and the issue, number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Comment on "Induced Drag of Wings of Finite Aspect Ratio" J93-059
Transient Structure of Vortex Breakdown on a Delta Wing J95-001
Directional Viscous Multigrid Using Adaptive Prismatic Meshes J95-010
Viscous–Inviscid Interaction Method for Unsteady Low-Speed Airfoil Flows J95-021
Multilevel Decomposition Procedure for Efficient Design Optimization of Helicopter Rotor Blades J95-039
Similarity Rule for Jet-Temperature Effects on Transonic Base Pressure J95-046
Dynamic Stall Control for Advanced Rotorcraft Application J95-048
Field Versus Laboratory Turbulent Boundary Layers J95-058
Structure of Supersonic Turbulent Boundary Layer After Expansion Regions J95-071
Three-Dimensional Multigrid Reynolds-Averaged Navier–Stokes Solver for Unstructured Meshes J95-073
Summary of the Interaction of a Rotor Wake with a Circular Cylinder J95-076
Predicting Stall and Post-Stall Behavior of Airfoils at Low Mach Numbers J95-094
Force and Moment on a Joukowski Profile in the Presence of Point Vortices J95-095
Prediction of Two-Dimensional Momentumless Wake by k-ε-γ Model J95-096
Wind-Tunnel Tests of an Inclined Cylinder Having Helical Grooves J95-103
Compressible Inviscid Vortex Flow of a Sharp Edge Delta Wing J95-105
Matrix Fraction Approach for Finite-State Aerodynamic Modeling J95-108
Computational Analysis of Buffet Alleviation in Viscous Transonic Flow over a Porous Airfoil J95-118
Strip Blowing from a Wedge at Hypersonic Speeds J95-129
Turbulent Drag Reduction Using Riblets on a Supercritical Airfoil at Transonic Speeds J95-145
Compressible Flowfield Solutions with Unstructured Grids Generated by Delaunay Triangulation J95-187
Viscous Airfoil Computations Using Adaptive Grid Redistribution J95-188
Flow Structure on Stalled Delta Wing Subjected to Small Amplitude Pitching Oscillations J95-194
Effect of Ice on Airfoil Stall at High Reynolds Numbers J95-208
Investigation of Flow at Leading and Trailing Edges of Pitching-Up Airfoil J95-214
Experimental Analysis of Surface Flow on a Delta Wing by Infrared Thermography J95-234
Prediction of Separation Bubbles Using Improved Transition Criterion with Two-Equation Turbulence Model J95-235
Magnitude of Artificial Dissipation for Numerical Simulations J95-241
Numerical/Experimental Study of a Wingtip Vortex in the Near Field J95-252
Panel Method Formulation for Oscillating Airfoils in Supersonic Flow J95-266
Perpendicular Blade Vortex Interaction J95-267
Calculated Effect of Freestream Turbulence on Aerodynamic Characteristics of a Delta Wing J95-276
Active Control of Vortex Breakdown over a Delta Wing J95-280
Measurements of Supersonic Wing Tip Vortices J95-283
Computational Model of Flexible Membrane Wings in Steady Laminar Flow J95-284
Advance in Overset Grid Schemes: From Chimera to DRAGON Grids J95-289
Determination of Starting Shock Velocity in Supersonic Wind Tunnel J95-315
New Evolutionary Direction Operator for Genetic Algorithms J95-319
Experimental Research on Blunt Trailing-Edge Airfoil Sections at Low Reynolds Numbers J95-321
Behavior of Linear Reconstruction Techniques on Unstructured Meshes J95-327
Computed Effects of Heat Transfer on the Transonic Flow over an Aerofoil J95-338
Effect of Shock Strength on Oblique Shock-Wave/Vortex Interaction J95-340
Buffeting of Fin: Distortion of Incident Vortex J95-341
Alternative Solution of the Kernel Function in Subsonic Unsteady Lifting Surface Theory J95-353
Starting Point of Curvature for Reflected Diffracted Shock Wave J95-354
Buffeting of Fins: An Assessment of Surface Pressure Loading J95-355
Viscous Interaction Phenomena in Hypersonic Wedge Flow J95-364
Euler-Based Inverse Method for Turbomachine Blades Part 1: Two-Dimensional Cascades J95-367

Aeroelasticity and Aeroservoelasticity

Flutter of an Infinitely Long Panel in a Duct J95-015
Experimental Evaluation of a Box Beam Specifically Tailored for Chordwise Deformation J95-016
Aeroservoelastic Aspects of Wing/Control Surface Planform Shape Optimization J95-050
Direct Coupling of Euler Flow Equations with Plate Finite Element Structures J95-064
Transonic Flutter Suppression Using Active Acoustic Excitations J95-107
Stress Considerations in Reduced-Size Aeroelastic Optimization J95-110
Unsteady Unified Hypersonic/Supersonic Method for Aeroelastic Applications Including Wave/Shock Interaction J95-169
Convergence Acceleration of a Navier–Stokes Solver for Efficient Static Aeroelastic Computations J95-175
Computational Model of Flexible Membrane Wings in Steady Laminar Flow J95-284
Optimal Design of Composite Lifting Surface for Flutter Suppression with Piezoelectric Actuators J95-301
Sensitivity of Flutter Response of a Wing to Shape and Modal Parameters J95-316
Buffeting of Fins: An Assessment of Surface Pressure Loading J95-355
Aeroelastic Analysis of Multibladed Hingeless Rotors in Hover J95-372

Configuration Design

Variable-Complexity Genetic Algorithm for Topological Design J95-351

Noise

Comment on "Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems" J95-005
Active Structural Acoustic Control of Noise Transmission Through Double Panel Systems J95-097
Biologically Inspired Controller for Sound Applications J95-123

Performance

Use of Streamwise Vorticity to Increase Mass Entrainment in a Cylindrical Ejector J95-263

Propeller and Rotor Systems

Whirl Speeds and Stability of Rotating Shaft Subjected to End Loads J95-253

Rotorcraft

Multilevel Decomposition Procedure for Efficient Design Optimization of Helicopter Rotor Blades J95-039
Dynamic Stall Control for Advanced Rotorcraft Application J95-048
Summary of the Interaction of a Rotor Wake with a Circular Cylinder J95-076
Torsional Actuation with Extension-Torsion Composite Coupling and a Magnetostrictive Actuator J95-111
Perpendicular Blade Vortex Interaction J95-267
Aeroelastic Analysis of Multibladed Hingeless Rotors in Hover J95-372

Stealth

Characteristic-Based, Time-Dependent Maxwell Equation Solvers on a General Curvilinear Frame J95-079

Structural Design (Including Loads)

Experimental Evaluation of a Box Beam Specifically Tailored for Chordwise Deformation J95-016
Improved Stiffness-Based First-Order Approximations for Structural Optimization J95-020
Integral Equation Formulation for Transient Structural Synthesis J95-052
Proposal of Constructive Algorithm and Discrete Shape Design of the Strongest Column J95-067
Stress Considerations in Reduced-Size Aeroelastic Optimization J95-110
Buckling of Polygonal and Circular Sandwich Plates J95-153
Pointwise Energy Release Rate in Delaminated Plates J95-202
Energy-Based Dynamic Buckling Estimates for Autonomous Dissipative Systems J95-206
Improved Two-Point Function Approximations for Design Optimization J95-274
Ribbed Cylindrical Shells Under a Concentrated Transverse Load J95-392

Structural Materials

Characterization of Nonlinear Viscoelastic Behavior Using a Dynamic Mechanical Approach J95-138
Parameter Estimation for Weibull Probability Distribution Function of Initial Fatigue Quality J95-254
Hierarchical Bending Analysis of Cord-Rubber Composites J95-374

Testing, Flight and Ground

Similarity Rule for Jet-Temperature Effects on Transonic Base Pressure J95-046
Quiet-Flow Ludwieg Tube for High-Speed Transition Research J95-106
Unsteady Adaptive Wall Models for Wind-Tunnel Testing J95-245
Perspective on Computational Fluid Dynamics Validation J95-285
Engineering Application of Experimental Uncertainty Analysis J95-300
Experimental and Theoretical Study of Wide-Angle Diffuser Flow with Screens J95-334

Vibration

Automated Mode Tracking Strategy J95-034
Biologically Inspired Controller for Sound Applications J95-123
Efficient Design Constraint Accounting for Mistuning Effects in Engine Rotors J95-152
Investigation of Natural Frequencies and Mode Shapes of Buckled Beams J95-173
Modeling Considerations for In-Phase Actuation of Actuators Bonded to Shell Structures J95-200
Whirl Speeds and Stability of Rotating Shaft Subjected to End Loads J95-253
Analytical Approach to Free Vibration of Sandwich Plates J95-318
Estimation of System Matrices by Dynamic Condensation and Application to Structural Modification J95-349
Aeroelastic Analysis of Multibladed Hingeless Rotors in Hover J95-372
Extraction of Free-Free Modes Using Constrained Test Data J95-393

Weather Hazards

Dynamics of Experimentally Simulated Microbursts J95-339

Energy

Microwaves

Characteristic-Based, Time-Dependent Maxwell Equation Solvers on a General Curvilinear Frame J95-079

Rotating Machinery

Turbulence Modeling of Confined Flow in Rotating Disk Systems J95-126
Cell-Vertex Adaptive Euler Method for Cascade Flows J95-365

Fluid Dynamics

Aeroacoustics

Responses of Finite Baffled Plate to Turbulent Flow Excitations J95-002
Numerical Study of Sound Generation due to a Spinning Vortex Pair J95-003
Aeroacoustic Model for Weak Shock Waves Based on Burgers Equation J95-004
Active Control of Far-Field Noise from a Ducted Propeller J95-040
Comparison of Higher Resolution Euler Schemes for Aeroacoustic Computations J95-041
High-Accuracy Algorithms for Computational Aeroacoustics J95-042
Sound Generation by Flow over a Two-Dimensional Cavity J95-068
Acoustic Study of B Helical Mode for Choked Axisymmetric Nozzle J95-069
Simulating Waves in Flows by Runge–Kutta and Compact Difference Schemes J95-070
Supersonic Jet Mixing Enhancement Using Impingement Tones from Obstacles of Various Geometries J95-074
Interaction of Jet Noise With a Nearby Panel Assembly J95-092
Active Structural Acoustic Control of Noise Transmission Through Double Panel Systems J95-097
Numerical Simulation of Trailing-Edge Acoustic/Vortical Interaction J95-122
Biologically Inspired Controller for Sound Applications J95-123
Interaction of a Weak Shock with Freestream Disturbances J95-154
Numerical Study of Transonic Blade-Vortex Interaction J95-215
Self-Sustained Flow Oscillation in a Ducted Combustor with Multiple Inlets J95-220
Sound Propagation Simulations Using Lattice Gas Methods J95-255
Panel Dynamic Response to a Reverberant Acoustic Field J95-256
Transparent Acoustic Source Condition Applied to the Euler Equations J95-277
Computational Aeroacoustics: Issues and Methods J95-286
Two-Dimensional Weak Shock-Vortex Interaction in a Mixing Zone J95-287
Evaluation of Boundary Conditions for Computational Aeroacoustics J95-322
Nonreflecting Boundary Conditions for Jet Flow Computations J95-360
Toward the Direct Calculation of Noise: Fluid/Acoustic Coupled Simulation J95-361
Thermoacoustic Oscillations in Combustion Chambers of Gas Turbines J95-362

Boundary Layers and Heat Transfer—Laminar

Numerical Simulation by Cubic–Polynomial Interpolation for Unsteady, Incompressible, Viscous Flow J95-022
Effect of Ambient Turbulence Intensity on Sphere Wakes at Intermediate Reynolds Numbers J95-029
Scaling of Incipient Separation in Supersonic/Transonic Speed Laminar Flows J95-032
Flux-Limited Schemes for the Compressible Navier–Stokes Equations J95-043
Rise of Total Pressure in Frictional Flow J95-119
Strip Blowing from a Wedge at Hypersonic Speeds J95-129
Control of Streamwise Vortices Using Selective Suction J95-167
Application of Similarity in Hypersonic Transition Prediction J95-239
Nonequilibrium-Dissociated Stagnation Boundary-Layer Flow on an Arbitrarily Catalytic Swept Wing J95-293
Criterion for the Detachment of Laminar and Turbulent Boundary Layers J95-337
Computed Effects of Heat Transfer on the Transonic Flow over an Aerofoil J95-338
Experimental Study of Saddle Point of Attachment in Laminar Juncture Flow J95-363

Boundary Layers and Heat Transfer—Turbulent

Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems J95-005
Comment on "Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems" J95-005
Reply by the Authors to P. G. Huang J95-005
Turbulent Transonic Airfoil Flow Simulation Using a Pressure-Based Algorithm J95-006
Assessment of Pressure-Strain Models in Predicting Compressible, Turbulent Ramp Flows J95-023
Experimental Study of Roughness Effects on the Separated Flow over a Backward-Facing Step J95-024
Effect of Ambient Turbulence Intensity on Sphere Wakes at Intermediate Reynolds Numbers J95-029
Structure of a Double-Fin Turbulent Interaction at High Speed J95-035
Field Versus Laboratory Turbulent Boundary Layers J95-058
Effects of Free End and Turbulence Intensities on Triangular Prism J95-062
Structure of Supersonic Turbulent Boundary Layer After Expansion Regions J95-071
Interferometric Study of Organized Motions in Turbulent Boundary Layers J95-072
Turbulence Anisotropy and Near-Wall Modeling in Predicting Three-Dimensional Shear-Flows J95-081
Predicting Stall and Post-Stall Behavior of Airfoils at Low Mach Numbers J95-094
Law of the Wall for Turbulent Flows in Pressure Gradients J95-098
Rise of Total Pressure in Frictional Flow J95-119
Reynolds Number Effects in Swept-Shock-Wave/Turbulent-Boundary-Layer Interaction J95-124
Skin-Friction Measurements in Three-Dimensional, Supersonic Shock-Wave/Boundary-Layer Interaction J95-125
Turbulence Modeling of Confined Flow in Rotating Disk Systems J95-126
Turbulent Drag Reduction Using Riblets on a Supercritical Airfoil at Transonic Speeds J95-145
Effect of Screen Porosity and Location on Wind-Tunnel Turbulence J95-151
Interaction of a Ribbon's Wake with a Turbulent Shear Flow J95-180
Variants of Biconjugate Gradient Method for Compressible Navier–Stokes Solver J95-185
Supersonic Flux-Split Procedure for Second Moments of Turbulence J95-186
Direct Numerical Simulation of Turbulent Transport with Uniform Wall Injection and Suction J95-190
Control of Shock-Wave/Boundary-Layer Interactions by Bleed J95-192
Technique for Direct Measurement of Skin Friction in High Enthalpy Impulsive Scramjet Flowfields J95-198
Experimental Investigation of Convecting Vortex/Boundary-Layer Interactions J95-216
Prediction of Separation Bubbles Using Improved Transition Criterion with Two-Equation Turbulence Model J95-235
Two-Equation Model for Turbulent Wall Flow J95-236
Computation of Compression Ramp Flow with a Cross-Diffusion Modified k-ε Model J95-237
Experimental Testing of Diffusion Models in a Manipulated Turbulent Boundary Layer J95-257
Turbulent Flow in Supersonic and Hypersonic Nozzles J95-262
Nonequilibrium Anisotropic Eddy–Viscosity/Diffusivity Turbulence Model for Heated Turbulent Flows J95-278
Perspective on Computational Fluid Dynamics Validation J95-285
Analysis of the Baldwin–Barth and Spalart–Allmaras One-Equation Turbulence Models J95-311
Near-Wall Integration of Reynolds Stress Turbulence Closures with No Wall Damping J95-312
Hypersonic Shockwave/Turbulent Boundary-Layer Interactions on a Porous Surface J95-313
Behavior of Pressure and Heat Transfer in Sharp Fin-Induced Turbulent Interactions J95-323
Effects of Mean Flow Three Dimensionality on Turbulent Boundary-Layer Structure J95-324
Prediction of Nonequilibrium Turbulent Flows with Explicit Algebraic Stress Models J95-325
Criterion for the Detachment of Laminar and Turbulent Boundary Layers J95-337
Computed Effects of Heat Transfer on the Transonic Flow over an Aerofoil J95-338
Asymmetric Crossing-Shock-Wave/Turbulent-Boundary-Layer Interaction J95-357

Boundary-Layer Stability and Transition

Responses of Finite Baffled Plate to Turbulent Flow Excitations J95-002
Comparison of Linear Stability Results with Flight Transition Data J95-025
Predicting Stall and Post-Stall Behavior of Airfoils at Low Mach Numbers J95-094
Relationship Between Transition and Modes of Instability in High-Speed Boundary Layers J95-120
Linear Stability of Differentially Heated Spatially Developing Layers J95-127
Link Between Flow Separation and Transition Onset J95-135
Sensitivity of Amplification-Factor Transition Criterion for Flow over Roughness Element J95-146
Control of Streamwise Vortices Using Selective Suction J95-167
Subsonic Boundary-Layer Tripping by Strip Blowing J95-181
Evolution of Stationary Crossflow Vortices in Boundary Layers on Swept Wings J95-197
Transition Model for High-Speed Flow J95-217
Prediction of Separation Bubbles Using Improved Transition Criterion with Two-Equation Turbulence Model J95-235
Active Control of Boundary-Layer Instabilities: Use of Sensors and Spectral Controller J95-238
Application of Similarity in Hypersonic Transition Prediction J95-239
Vortex Development over Flat Plate Riblets in a Transitioning Boundary Layer J95-240
Three-Dimensional Boundary-Layer Transition on a Swept Wing at Mach 3.5 J95-326
Viscous Interaction Phenomena in Hypersonic Wedge Flow J95-364

Computational Fluid Dynamics

Numerical Study of Sound Generation due to a Spinning Vortex Pair J95-003
Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems J95-005
Comment on "Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems" J95-005
Reply by the Authors to P. G. Huang J95-005
Turbulent Transonic Airfoil Flow Simulation Using a Pressure-Based Algorithm J95-006
Eulerian/Lagrangian Coupling Procedure for Three-Dimensional Vortical Flows J95-007
Approach for Dynamic Grids J95-009
Directional Viscous Multigrid Using Adaptive Prismatic Meshes J95-010
Parallel, Scalable Parabolized Navier–Stokes Solver for Large-Scale Simulations J95-014
Viscous–Inviscid Interaction Method for Unsteady Low-Speed Airfoil Flows J95-021
Numerical Simulation by Cubic–Polynomial Interpolation for Unsteady, Incompressible, Viscous Flow J95-022
Spurious Numerical Solutions in Higher Dimensional Discrete Systems J95-026
Application of Control-Volume-Based Finite Element Formulation to the Shock Tube Problem J95-027
Observations on Using Experimental Data as Boundary Conditions for Computations J95-031
Quantitative Comparison Between Interferometric Measurements and Euler Computations for Supersonic Cone Flows J95-037
Comparison of Higher Resolution Euler Schemes for Aeroacoustic Computations J95-041
High-Accuracy Algorithms for Computational Aeroacoustics J95-042
Flux-Limited Schemes for the Compressible Navier–Stokes Equations J95-043
Weighted Least Squares Method of Grid Generation J95-059
Direct Coupling of Euler Flow Equations with Plate Finite Element Structures J95-064
Three-Dimensional Multigrid Reynolds-Averaged Navier–Stokes Solver for Unstructured Meshes J95-073
Turbulence Anisotropy and Near-Wall Modeling in Predicting Three-Dimensional Shear-Flows J95-081
Transonic Wind-Tunnel Flows About a Fully Configured Model of Aircraft J95-088
Numerical Investigation of Supersonic Annular Flow About Struts of Various Thicknesses J95-090
Interaction of Jet Noise With a Nearby Panel Assembly J95-092
Prediction of Two-Dimensional Momentumless Wake by k-ε-γ Model J95-096
Law of the Wall for Turbulent Flows in Pressure Gradients J95-098
Agglomeration Multigrid for the Three-Dimensional Euler Equations J95-099
Dynamic Unstructured Method for Flows Past Multiple Objects in Relative Motion J95-100
Validation of Code Using Turbulence Model Applied to Three-Dimensional Transonic Channel J95-104
Matrix Fraction Approach for Finite-State Aerodynamic Modeling J95-108
Time-Marching Analysis of Fluid-Coupled Systems with Large Added Mass J95-115
Computational Analysis of Buffet Alleviation in Viscous Transonic Flow over a Porous Airfoil J95-118
Numerical Simulation of Trailing-Edge Acoustic/Vortical Interaction J95-122
Reynolds Number Effects in Swept-Shock-Wave/Turbulent-Boundary-Layer Interaction J95-124
Turbulence Modeling of Confined Flow in Rotating Disk Systems J95-126
Upwind-Biased Finite-Volume Technique Solving Navier–Stokes Equations on Irregular Meshes J95-128
Direct and Iterative Algorithms for the Three-Dimensional Euler Equations J95-130

Fully Implicit Solution of Time-Dependent Partial Differential Equations in Arbitrary Multizone Domains J95-131
Adaptive Grid Scheme for Vortex-Induced Boundary Layers J95-132
Numerical Behavior of Unsteady Waves J95-136
Integration of Navier–Stokes Equations Using Dual Time Stepping and a Multigrid Method J95-155
Staggered Upwind Method for Solving Navier–Stokes and k-ω Turbulence Model Equations J95-156
Anomalous Asymmetries in Flows Generated by Algorithms that Fail to Conserve Symmetry J95-157
Optimal Multistage Schemes for Euler Equations with Residual Smoothing J95-158
Semistructured Mesh Generation for Three-Dimensional Navier–Stokes Calculations J95-159
Some Aspects of High-Speed Blunt Body Flow Computations with Roe Scheme J95-160
Flow Features of Shock-Induced Combustion Around Projectile Traveling at Hypervelocities J95-164
Simulation of Three-Dimensional Turbulent Flows on Unstructured Meshes J95-168
Neuromorphic Approach to Inverse Problems in Aerodynamics J95-177
Grid Combination Method for Hyperbolic Grid Solver in Regions with Enclosed Boundaries J95-178
Variants of Biconjugate Gradient Method for Compressible Navier–Stokes Solver J95-185
Supersonic Flux-Split Procedure for Second Moments of Turbulence J95-186
Compressible Flowfield Solutions with Unstructured Grids Generated by Delaunay Triangulation J95-187
Viscous Airfoil Computations Using Adaptive Grid Redistribution J95-188
Comparison of Nonequilibrium Solution Algorithms Applied to Chemically Stiff Hypersonic Flows J95-189
Unstructured Grid Simulations of Spatially Evolving Supersonic Shear Layers J95-191
High-Order Hybrid Numerical Simulations of Two-Dimensional Detonation Waves J95-193
Large-Eddy Simulation of Turbulent Anisochoric Flows J95-195
Evolution of Stationary Crossflow Vortices in Boundary Layers on Swept Wings J95-197
Geometric Properties of Arbitrary Polyhedra in Terms of Face Geometry J95-207
Effect of Ice on Airfoil Stall at High Reynolds Numbers J95-208
Numerical Study of Transonic Blade-Vortex Interaction J95-215
Transition Model for High-Speed Flow J95-217
Compressible Cavity Flow Oscillation due to Shear Layer Instabilities and Pressure Feedback J95-219
Lower-Upper Scheme for Chemically Reacting Flow with Finite Rate Chemistry J95-221
Computational Method of Second-Moment Turbulence Closures in Complex Geometries J95-222
Two-Equation Model for Turbulent Wall Flow J95-236
Active Control of Boundary-Layer Instabilities: Use of Sensors and Spectral Controller J95-238
Magnitude of Artificial Dissipation for Numerical Simulations J95-241
Unsteady Adaptive Wall Models for Wind-Tunnel Testing J95-245
Numerical/Experimental Study of a Wingtip Vortex in the Near Field J95-252
Sound Propagation Simulations Using Lattice Gas Methods J95-255
Sensitivity Analysis of Unsteady Aerodynamic Loads in Cascades J95-258
Pressure-Based Control-Volume Finite Element Method for Flow at All Speeds J95-259
Unstructured Grid Generation Using Iterative Point Insertion and Local Reconnection J95-260
Numerical Study of Hypersonic Leeward Flow over a Blunt Nosed Delta Wing J95-261
Turbulent Flow in Supersonic and Hypersonic Nozzles J95-262
Calculated Effect of Freestream Turbulence on Aerodynamic Characteristics of a Delta Wing J95-276
Transparent Acoustic Source Condition Applied to the Euler Equations J95-277
Nonequilibrium Anisotropic Eddy–Viscosity/Diffusivity Turbulence Model for Heated Turbulent Flows J95-278
Shock Wave/Vortex Interaction in a Flow over 90-deg Sharp Corner J95-279
Computational Model of Flexible Membrane Wings in Steady Laminar Flow J95-284
Perspective on Computational Fluid Dynamics Validation J95-285
Computational Aeroacoustics: Issues and Methods J95-286
Numerical Investigation of Dynamic Stall of an Oscillating Wing J95-288
Advance in Overset Grid Schemes: From Chimera to DRAGON Grids J95-289
Coarse Grid Correction Scheme for Implicit Multiblock Euler Calculations J95-290
Multigrid Acceleration of an Upwind Euler Solver on Unstructured Meshes J95-291
Computational Study of Large-Disturbance Oscillations in Unsteady Supersonic Combustion Around Projectiles J95-292
Axisymmetric Oscillations of an Opposing Jet from a Hemispherical Nose J95-295
Sensitivity Study of Turbulent Reacting Flow Modeling in Gas Turbine Combustors J95-296
Analysis of the Baldwin–Barth and Spalart–Allmaras One-Equation Turbulence Models J95-311
Computation of Transonic Flows with Shock-Induced Separation Using Algebraic Turbulence Models J95-314
New Evolutionary Direction Operator for Genetic Algorithms J95-319
Evaluation of Boundary Conditions for Computational Aeroacoustics J95-322
Prediction of Nonequilibrium Turbulent Flows with Explicit Algebraic Stress Models J95-325
Behavior of Linear Reconstruction Techniques on Unstructured Meshes J95-327
Preconditioning Applied to Variable and Constant Density Flows J95-328
Error Estimator and Adaptive Moving Grids for Finite Volumes Schemes J95-329
Comparison of Implicit Schemes for the Incompressible Navier–Stokes Equations J95-330
Multigrid Algorithm for Three-Dimensional Incompressible High-Reynolds Number Turbulent Flows J95-331
Comparison of High-Resolution Schemes Applied to Flows Containing Strong Shocks J95-333
Experimental and Theoretical Study of Wide-Angle Diffuser Flow with Screens J95-334
Structure of a Turbulent Double-Fin Interaction at Mach 4 J95-358
Nonreflecting Boundary Conditions for Jet Flow Computations J95-360
Cell-Vertex Adaptive Euler Method for Cascade Flows J95-365
Multigrid Approach to Overset Grid Communication J95-366
Euler-Based Inverse Method for Turbomachine Blades Part 1: Two-Dimensional Cascades J95-367
Rarefied Gas Flow Simulation Based on Quasigasdynamic Equations J95-368
Unified Turbulence Closure Model for Axisymmetric and Planar Free Shear Flows J95-369
Compressibility Effects and Mixing Enhancement in Turbulent Free Shear Flows J95-370
Large Eddy Simulation of Reacting Flows Applied to Bluff Body Stabilized Flames J95-371
Conjugate Gradient Squared Algorithm for Panel Methods J95-384
Correct Limit Approximations for Planar, Cylindrical, and Spherical Blast Waves J95-385

Hydrodynamics

Numerical Simulation by Cubic–Polynomial Interpolation for Unsteady, Incompressible, Viscous Flow J95-022
Force and Moment on a Joukowski Profile in the Presence of Point Vortices J95-095
Stability of a Compressible Axisymmetric Swirling Jet J95-101
Linear Stability of Differentially Heated Spatially Developing Layers J95-127
Effect of Screen Porosity and Location on Wind-Tunnel Turbulence J95-151
Semi-Infinite Channel Flows Past a Cylindrical Body: A Numerical Study J95-179
Active Control of Boundary-Layer Instabilities: Use of Sensors and Spectral Controller J95-238
Shrinkage Flow Effects on the Convective Stability of NH_4Cl-H_20 Directional Solidification J95-243
Surface Pressure Measurements on a Pitching Swept Wing in a Water Channel J95-298
Multigrid Algorithm for Three-Dimensional Incompressible High-Reynolds Number Turbulent Flows J95-331

Hypersonic Flow

Vibration–Dissociation Coupling in Nonequilibrium Hypersonic Viscous Flows J95-011
Hypersonic Shock-Induced Combustion in a Hydrogen–Air System J95-030
Scaling of Incipient Separation in Supersonic/Transonic Speed Laminar Flows J95-032
Hypersonic Model Testing in a Shock Tunnel J95-044
Perspective on Hypersonic Nonequilibrium Flow J95-066
Upwind-Biased Finite-Volume Technique Solving Navier–Stokes Equations on Irregular Meshes J95-128
Strip Blowing from a Wedge at Hypersonic Speeds J95-129
Some Aspects of High-Speed Blunt Body Flow Computations with Roe Scheme J95-160
Comparison of Nonequilibrium Solution Algorithms Applied to Chemically Stiff Hypersonic Flows J95-189
Radiatively Driven Hypersonic Wind Tunnel J95-227
Application of Similarity in Hypersonic Transition Prediction J95-239
Numerical Study of Hypersonic Leeward Flow over a Blunt Nosed Delta Wing J95-261
Nonequilibrium-Dissociated Stagnation Boundary-Layer Flow on an Arbitrarily Catalytic Swept Wing J95-293

Hypersonic Shockwave/Turbulent Boundary-Layer Interactions on a Porous Surface J95-313
New Similarity Solutions for Hypersonic Boundary Layers with Applications to Inlet Flows J95-332
Comparison of High-Resolution Schemes Applied to Flows Containing Strong Shocks J95-333
Viscous Interaction Phenomena in Hypersonic Wedge Flow J95-364
Rarefied Gas Flow Simulation Based on Quasi-gasdynamic Equations J95-368

Inlet, Nozzle, Diffuser, and Channel Flows

Asymptotic Velocity Defect Profile in an Incipient-Separating Axisymmetric Flow J95-013
Simulating Heat Addition via Mass Addition in Constant Area Compressible Flows J95-028
Prediction of Supersonic Inlet Unstart Caused by Freestream Disturbances J95-045
Jet Mixing Control Using Excitation from Miniature Oscillating Jets J95-060
Acoustic Study of B Helical Mode for Choked Axisymmetric Nozzle J95-069
Investigation of Supersonic Flow About Strut/Endwall Intersections in an Annular Duct J95-093
Validation of Code Using Turbulence Model Applied to Three-Dimensional Transonic Channel J95-104
Direct Numerical Simulation of Turbulent Transport with Uniform Wall Injection and Suction J95-190

Simulation of Three-Dimensional Turbulent Flows on Unstructured Meshes J95-168

Combustion and Combustor Designs

Simulating Heat Addition via Mass Addition in Constant Area Compressible Flows J95-028
Lower-Upper Scheme for Chemically Reacting Flow with Finite Rate Chemistry J95-221
Influence of Pressure Waves on the Initial Development of an Explosion Kernel J95-265
Matrix Dissipation for Central Difference Schemes with Combustion J95-297
Thermoacoustic Oscillations in Combustion Chambers of Gas Turbines J95-362

Combustion Instability

Two-Dimensional Shear-Layer Entrainment and Interface-Length Measurements J95-147
Computational Study of Large-Disturbance Oscillations in Unsteady Supersonic Combustion Around Projectiles J95-292
Thermoacoustic Oscillations in Combustion Chambers of Gas Turbines J95-362

Droplet Characterization

Spray Impingement on a Hot Surface in Reacting Stagnation Flows J95-163

Electric and Advanced Space Propulsion

Experimental Investigation of Velocity Slip near an Arcjet Exit Plane J95-063

Ramjets and Scramjets

Simulation of Transverse Gas Injection in Turbulent Supersonic Air Flows J95-008
Simulating Heat Addition via Mass Addition in Constant Area Compressible Flows J95-028
Technique for Direct Measurement of Skin Friction in High Enthalpy Impulsive Scramjet Flowfields J95-198

Supersonic Combustion

Computational Study of Large-Disturbance Oscillations in Unsteady Supersonic Combustion Around Projectiles J95-292

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Hypersonic Model Testing in a Shock Tunnel J95-044
Effects of Chemistry on Blunt-Body Wake Structure J95-075

Structural Mechanics and Materials

Aeroelasticity and Control

Flutter of an Infinitely Long Panel in a Duct J95-015
Aeroservoelastic Aspects of Wing/Control Surface Planform Shape Optimization J95-050
Direct Coupling of Euler Flow Equations with Plate Finite Element Structures J95-064
Effect of Concentrated Mass on Stability of Cantilevers Under Rocket Thrust J95-080
Transonic Flutter Suppression Using Active Acoustic Excitations J95-107
Matrix Fraction Approach for Finite-State Aerodynamic Modeling J95-108
Stability of Viscoelastic Plate in Supersonic Flow Under Random Loading J95-109
Stress Considerations in Reduced-Size Aeroelastic Optimization J95-110
Time-Marching Analysis of Fluid-Coupled Systems with Large Added Mass J95-115
Unsteady Unified Hypersonic/Supersonic Method for Aeroelastic Applications Including Wave/Shock Interaction J95-169
Suppression of Nonlinear Panel Flutter with Piezoelectric Actuators Using Finite Element Method J95-170
Convergence Acceleration of a Navier–Stokes Solver for Efficient Static Aeroelastic Computations J95-175
New Mode Tracking Methods in Aeroelastic Analysis J95-199
Shock Oscillation in a Two-Dimensional, Flexible-Wall Nozzle J95-246
Effect of Transverse Shear on Aeroelastic Stability of a Composite Rotor Blade J95-247
Optimal Design of Composite Lifting Surface for Flutter Suppression with Piezoelectric Actuators J95-301
Sensitivity of Flutter Response of a Wing to Shape and Modal Parameters J95-316

Dynamic Model Analysis

Free Vibrations and Sensitivity Analysis of a Defective Two Degree-of-Freedom System J95-017
Vibration and Buckling of Flexible Rotating Beams J95-084
Bypassing Numerical Difficulties Associated with Updating Simultaneously Mass and Stiffness Matrices J95-085
Structural Modeling Issues in Flexible Systems J95-140
Multiple Acceptable Solutions in Structural Model Improvement J95-141
Interaction of Local and Global Nonlinearities of Elastic Rotating Structures J95-143
Modeling Considerations for In-Phase Actuation of Actuators Bonded to Shell Structures J95-200
Model of Transverse Plate Impact Dynamics for Design of Impact Detection Methodologies J95-204
Passive Damping of Truss Vibration Using Preloaded Joint Backlash J95-205
Genetic-Algorithm-Based Procedure for Pretest Analysis J95-213
Model Correlation Using Multiple Static Load and Vibration Tests J95-346

Flexible and Active Structures

Closed-Form Expressions for Higher Order Electroelastic Tetrahedral Elements J95-019
Object-Oriented Approach to Modeling and Analysis of Truss Structures J95-056
Vibration and Buckling of Flexible Rotating Beams J95-084
Alleviation of Chattering in Flexible Beam Control via Piezofilm Actuator and Sensor J95-091
Torsional Actuation with Extension-Torsion Composite Coupling and a Magnetostrictive Actuator J95-111
Shape Control of Plates Using Piezoceramic Elements J95-210
Deflection Control During Dynamic Deformations of a Rectangular Plate Using Piezoceramic Elements J95-249
Panel Dynamic Response to a Reverberant Acoustic Field J95-256
Distributed Transfer Function Method for Analysis of Cylindrical Shells J95-271
Structural/Control System Optimization with Variable Actuator Masses J95-272
Pin-Force and Euler-Bernoulli Models for Analysis of Intelligent Structures J95-281
Direct Strain Measure for Large-Deformation Analyses of Beam Structures J95-306
Shape Memory Ceramic Actuation of Adaptive Structures J95-344
Modal Analysis Using Segmented Piezoelectric Sensors J95-376

Materials Structural Properties

Postbuckling Compressive Strength of Graphite/Epoxy Laminated Cylindrical Panels Loaded in Compression J95-038
Kelvin–Voigt vs Fractional Derivative Model as Constitutive Relations for Viscoelsatic Materials J95-086
Energy-Based Mechanical Model for Mixed Mode Failure of Laminated Composites J95-113
Characterization of Nonlinear Viscoelastic Behavior Using a Dynamic Mechanical Approach J95-138
Failure of Tapered Composites Under Static and Fatigue Tension Loading J95-139
Impact Damage Resistance of Several Laminated Material Systems J95-171
Effective Transverse Young's Modulus of Composites with Viscoelastic Interphase J95-250
Parameter Estimation for Weibull Probability Distribution Function of Initial Fatigue Quality J95-254
Stochastic Modeling of Fracture Processes in Fiber Reinforced Composites J95-270

Structural Composite Materials

Comment on "Flexural Behavior of a Rotating Sandwich Tapered Beam" and on "Dynamic Analysis for Free Vibrations of Rotating Sandwich Tapered Beams" J89-048
Reply by the Author to Dewey H. Hodges J89-048
Postbuckling Compressive Strength of Graphite/Epoxy Laminated Cylindrical Panels Loaded in Compression J95-038
Compressive Buckling of Rectangular Composite Plates with a Free-Edge Delamination J95-051
Circular-Arc Inclusion at Isotropic Bimaterial Interface J95-054
Design of Scaled Down Models for Stability of Laminated Plates J95-082
Substructure Synthesis Method for Frequency Response of Viscoelastic Structures J95-083
Alleviation of Chattering in Flexible Beam Control via Piezofilm Actuator and Sensor J95-091
Optimal Through-Thickness Temperature Gradients for Control of Interlaminar Stresses in Composites J95-112

Energy-Based Mechanical Model for Mixed Mode Failure of Laminated Composites J95-113
Failure of Tapered Composites Under Static and Fatigue Tension Loading J95-139
Buckling of Arbitrary Quadrilateral Anisotropic Plates J95-144
Impact Damage Resistance of Several Laminated Material Systems J95-171

Chronological Index

J89-048 Flexural Behavior of a Rotating Sandwich Tapered Beam. C. L. Ko, *Oakland University* (**27**, 3, p. 359) Article
Technical Comment by Dewey H. Hodges, *Georgia Institute of Technology* (**33**, 6, p. 1168)
Reply (**33**, 6, p. 1170)

J92-391 Modal Analysis of Structures with Holonomic Constraints. Shih-Ming Yang, *National Cheng Kung University, Taiwan, ROC* (**30**, 10, p. 2526) Article
Technical Comment by Peter Hagedorn, *Technische Hochschule, Germany* (**33**, 9, p. 1754)

J93-059 Induced Drag of Wings Finite Aspect Ratio. F. Lam, *University of Cambridge, England, UK* (**31**, 2, p. 396) Technical Note
Technical Comment by A. W. Bloy and M. Jouma'a, *University of Manchester, England, UK* (**33**, 5, p. 968)

J93-175 Wakes of Three Axisymmetric Bodies at Zero Angle of Attack. Özlem Ilday, Hayri Acar, M. Kubilary Elbay, and Veysel Ati, *Istanbul Technical University, Turkey* (**31**, 6, p. 1152) Technical Note
Technical Comment by Oktay Özcan, *Istanbul Technical University, Turkey*; D. A. Johnson, *NASA Ames Research Center*; and Roger L. Simpson, *Virginia Polytechnic Institute and State University* (**33**, 3, p. 569)
Reply (**33**, 3, p. 570)

J94-044 Infrared Imaging of Large-Amplitude, Low-Frequency Disturbances on a Planar Jet. Robert B. Farrington and Scott D. Claunch, *National Renewable Energy Laboratory* (**32**, 2, p. 317) Article
Technical Comment by Ehud Gartenberg and A. Sidney Roberts Jr., *Old Dominion University* (**33**, 3, p. 568)
Reply (**33**, 3, p. 568)

J94-052 New Family of Modal Methods for Calculating Eigenvector Derivatives. Mehmet A. Akgün, *Middle East Technical University, Turkey* (**32**, 2, p. 379) Article based on AIAA Paper 92-1388 CP931
Technical Comment by M. S. Jankovic, *Universe Enterprises Ltd., Canada* (**33**, 5, p. 965)
Reply (**33**, 5, p. 967)

J94-285 Diverging Solutions of the Boundary-Layer Equation near a Plane of Symmetry. Hans Thomann, *Swiss Federal Institute of Technology* (**32**, 9, p. 1923) Technical Note
Errata (**33**, 3, p. 567)

J94-314 Van Driest Transformation and Compressible Wall-Bounded Flows. P. G. Huang, *Eloret Institute*; and G. N. Coleman, *NASA Ames Research Center* (**32**, 10, p. 2110) Technical Note
Errata (**33**, 9, p. 1756)

J94-320 Application of Singular Value Decomposition to Direct Matrix Update Method. Wai Ming To, *Hong Kong University of Science and Technology* (**32**, 10, p. 2124) Technical Note
Technical Comment by Alex Berman (**33**, 6, p. 1172)

J95-001 Transient Structure of Vortex Breakdown on a Delta Wing. J.-C. Lin and D. Rockwell, *Lehigh University* (**33**, 1, p. 6) Article

J95-002 Responses of Finite Baffled Plate to Turbulent Flow Excitations. Sean F. Wu, *Wayne State University*; and Lucio Maestrello, *NASA Langley Research Center* (**33**, 1, p. 13) Article

J95-003 Numerical Study of Sound Generation due to a Spinning Vortex Pair. Duck Joo Lee and Sam Ok Koo, *Korea Advanced Institute of Science and Technology* (**33**, 1, p. 20) Article based on AIAA Paper 93-4370

J95-004 Aeroacoustic Model for Weak Shock Waves Based on Burgers Equation. Sanford S. Davis, *NASA Ames Research Center* (**33**, 1, p. 27) Article

J95-005 Application of Wall Functions to Generalized Nonorthogonal Curvilinear Coordinate Systems. Douglas L. Sondak, *NASA Ames Research Center*; and Richard H. Pletcher, *Iowa State University* (**33**, 1, p. 33) Article
Technical Comment by P. G. Huang, *NASA Ames Research Center* (**33**, 12, p. 2445)
Reply (**33**, 12, p. 2446)

J95-006 Turbulent Transonic Airfoil Flow Simulation Using a Pressure-Based Algorithm. Gang Zhou, Lars Davidson, and Erik Olsson, *Chalmers University of Technology, Sweden* (**33**, 1, p. 42) Article based on AIAA Paper 94-2345

J95-007 Eulerian/Lagrangian Coupling Procedure for Three-Dimensional Vortical Flows. Hélène M. Felici, *Swiss Federal Institute of Technology*; and Mark Drela, *Massachusetts Institute of Technology* (**33**, 1, p. 48) Article based on AIAA Paper 93-3370 CP933

J95-008 Simulation of Transverse Gas Injection in Turbulent Supersonic Air Flows. F. Grasso, *University of Rome "La Sapienza," Italy*; and V. Magi, *University of Reggio Calabria, Italy* (**33**, 1, p. 56) Article based on AIAA Paper 93-2925

J95-009 Approach for Dynamic Grids. J. W. Slater and M. S. Liou, *NASA Lewis Research Center*; and R. G. Hindman, *Iowa State University* (**33**, 1, p. 63) Article based on AIAA Paper 94-0319

J95-010 Directional Viscous Multigrid Using Adaptive Prismatic Meshes. V. Parthasarathy and Y. Kallinderis, *University of Texas at Austin* (**33**, 1, p. 69) Article

J95-011 Vibration–Dissociation Coupling in Nonequilibrium Hypersonic Viscous Flows. D. Zeitoun, E. Schall, Y. Burtschell, and M. C. Druguet, *Université de Provence, France* (**33**, 1, p. 79) Article based on AIAA Paper 94-1989

J95-012 Effects of Streamwise Vorticity Injection on a Plane Turbulent Wake. James H. Weygandt, *Stanford University*; and Rabindra D. Mehta, *Stanford University/NASA Ames Research Center* (**33**, 1, p. 86) Article

J95-013 Asymptotic Velocity Defect Profile in an Incipient-Separating Axisymmetric Flow. Rakesh K. Singh and Ram S. Azad, *University of Manitoba, Canada* (**33**, 1, p. 94) Article

J95-014 Parallel, Scalable Parabolized Navier–Stokes Solver for Large-Scale Simulations. A. K. Stagg, *Cray Research, Inc.*; D. D. Cline and G. F. Carey, *University of Texas at Austin*; and J. N. Shadid, *Sandia National Laboratories* (**33**, 1, p. 102) Article

J95-015 Flutter of an Infinitely Long Panel in a Duct. Ronald J. Epstein, Ramakrishna Srinivasan, and Earl H. Dowell, *Duke University* (**33**, 1, p. 109) Article

J95-016 Experimental Evaluation of a Box Beam Specifically Tailored for Chordwise Deformation. Lawrence W. Rehfield,

Peter J. Zischka, Stephen Chang, and Michael L. Fentress, *University of California, Davis*; and Damodar R. Ambur, *NASA Langley Research Center* (**33**, 1, p. 116) Article based on AIAA Paper 93-1342 CP931

J95-017 Free Vibrations and Sensitivity Analysis of a Defective Two Degree-of-Freedom System. A. Luongo, *University of L'Aquila, Italy* (**33**, 1, p. 120) Article

J95-018 Method for Determining Minimum-Order Mass and Stiffness Matrices from Modal Test Data. K. F. Alvin, L. D. Peterson, and K. C. Park, *University of Colorado* (**33**, 1, p. 128) Article

J95-019 Closed-Form Expressions for Higher Order Electroelastic Tetrahedral Elements. Mohammad A. Moetakef, Kent L. Lawrence, Shiv P. Joshi, and Panayiotis S. Shiakolas, *University of Texas at Arlington* (**33**, 1, p. 136) Article

J95-020 Improved Stiffness-Based First-Order Approximations for Structural Optimization. Uri Kirsch, *Technion—Israel Institute of Technology* (**33**, 1, p. 143) Article

J95-021 Viscous–Inviscid Interaction Method for Unsteady Low-Speed Airfoil Flows. Ismail H. Tuncer, John A. Ekaterinaris, and Max F. Platzer, *U.S. Naval Postgraduate School* (**33**, 1, p. 151) Technical Note

J95-022 Numerical Simulation by Cubic–Polynomial Interpolation for Unsteady, Incompressible, Viscous Flow. Hiromi Sugiyama, *Japan Automobile Research Institute* (**33**, 1, p. 154) Technical Note

J95-023 Assessment of Pressure–Strain Models in Predicting Compressible, Turbulent Ramp Flows. R. Abid, *High Technology Corporation*; Thomas B. Gatski, *NASA Langley Research Center*; and Joseph H. Morrison, *Analytical Services and Materials, Inc.* (**33**, 1, p. 156) Technical Note

J95-024 Experimental Study of Roughness Effects on the Separated Flow over a Backward-Facing Step. Byung Nam Kim and Myung Kyoon Chung, *Korea Advanced Institute of Science and Technology* (**33**, 1, p. 159) Technical Note

J95-025 Comparison of Linear Stability Results with Flight Transition Data. J. A. Masad and M. R. Malik, *High Technology Corporation* (**33**, 1, p. 161) Technical Note

J95-026 Spurious Numerical Solutions in Higher Dimensional Discrete Systems. Itaru Hataue, *Kumamoto University, Japan* (**33**, 1, p. 163) Technical Note based on AIAA Paper 94-0191

J95-027 Application of Control-Volume-Based Finite Element Formulation to the Shock Tube Problem. S. M. H. Karimian and G. E. Schneider, *University of Waterloo, Canada* (**33**, 1, p. 165) Technical Note based on AIAA Paper 94-0131

J95-028 Simulating Heat Addition via Mass Addition in Constant Area Compressible Flows. W. H. Heiser, W. B. McClure, and C. W. Wood, *U.S. Air Force Academy* (**33**, 1, p. 167) Technical Note

J95-029 Effect of Ambient Turbulence Intensity on Sphere Wakes at Intermediate Reynolds Numbers. J.-S. Wu and G. M. Faeth, *University of Michigan* (**33**, 1, p. 171) Technical Note

J95-030 Hypersonic Shock-Induced Combustion in a Hydrogen–Air System. J. K. Ahuja and S. N. Tiwari, *Old Dominion University*; and D. J. Singh, *Analytical Services and Materials, Inc.* (**33**, 1, p. 173) Technical Note

J95-031 Observations on Using Experimental Data as Boundary Conditions for Computations. Paul D. Orkwis, Chung-Jen Tam, and Peter J. Disimile, *University of Cincinnati* (**33**, 1, p. 176) Technical Note based on AIAA Paper 94-0589
Errata (**33**, 6, p. 1167)

J95-032 Scaling of Incipient Separation in Supersonic/Transonic Speed Laminar Flows. George R. Inger, *Iowa State University* (**33**, 1, p. 178) Technical Note based on AIAA Paper 93-3435 CP935

J95-033 Simple Method of Supersonic Flow Visualization Using Watertable. A. K. Pal and B. Bose, *Jadavpur University, India* (**33**, 1, p. 181) Technical Note
Errata (**33**, 11, p. 2236)

J95-034 Automated Mode Tracking Strategy. T. Ting, *University of Bridgeport*; and T. L. C. Chen and W. J. Twomey, *Sikorsky Aircraft* (**33**, 1, p. 183) Technical Note based on AIAA Paper 93-1414 CP931

J95-035 Structure of a Double-Fin Turbulent Interaction at High Speed. Datta Gaitonde, J. S. Shang, and Miguel Visbal, *U.S. Air Force Wright Laboratory* (**33**, 2, p. 193) Article

J95-036 Study of Subsonic Base Cavity Flowfield Structure Using Particle Image Velocimetry. Michael J. Molezzi and J. Craig Dutton, *University of Illinois at Urbana–Champaign* (**33**, 2, p. 201) Article based on AIAA Paper 93-3040

J95-037 Quantitative Comparison Between Interferometric Measurements and Euler Computations for Supersonic Cone Flows. T. A. W. M. Lanen, E. M. Houtman, and P. G. Bakker, *Delft University of Technology, The Netherlands* (**33**, 2, p. 210) Article based on AIAA Paper 92-2691

J95-038 Postbuckling Compressive Strength of Graphite/Epoxy Laminated Cylindrical Panels Loaded in Compression. J. H. Kweon, C. S. Hong, and I. C. Lee, *Korea Advanced Institute of Science and Technology* (**33**, 2, p. 217) Article based on AIAA Paper 94-1341

J95-039 Multilevel Decomposition Procedure for Efficient Design Optimization of Helicopter Rotor Blades. Aditi Chattopadhyay, Thomas R. McCarthy, and Narayanan Pagaldipti, *Arizona State University* (**33**, 2, p. 223) Article

J95-040 Active Control of Far-Field Noise from a Ducted Propeller. Daniel L. Sutliff and Robert T. Nagel, *North Carolina State University* (**33**, 2, p. 231) Article based on AIAA Paper 93-4356

J95-041 Comparison of Higher Resolution Euler Schemes for Aeroacoustic Computations. San-Yih Lin and Yan-Shin Chin, *National Cheng Kung University, Taiwan, ROC* (**33**, 2, p. 237) Article

J95-042 High-Accuracy Algorithms for Computational Aeroacoustics. David P. Lockard, *George Washington Univesity*; and Kenneth S. Brentner and H. L. Atkins, *NASA Langley Research Center* (**33**, 2, p. 246) Article based on AIAA Paper 94-0460

J95-043 Flux-Limited Schemes for the Compressible Navier–Stokes Equations. S. Tatsumi, L. Martinelli, and A. Jameson, *Princeton University* (**33**, 2, p. 252) Article based on AIAA Paper 94-0647

J95-044 Hypersonic Model Testing in a Shock Tunnel. H. Olivier and H. Grönig, *RWTH Aachen, Germany*; and A. Le Bozec, *Dassault Aviation, France* (**33**, 2, p. 262) Article

J95-045 Prediction of Supersonic Inlet Unstart Caused by Freestream Disturbances. David W. Mayer and Gerald C. Payn-

ter, *Boeing Commercial Airplane Group* (**33**, 2, p. 266) Article based on AIAA Paper 94-0580

J95-046 Similarity Rule for Jet-Temperature Effects on Transonic Base Pressure. Keisuke Asai, *National Aerospace Laboratory, Japan* (**33**, 2, p. 276) Article based on AIAA Paper 94-2571

J95-047 Experimental Study of Flow Separation on an Oscillating Flap at Mach 2.4. Michael D. Coon and Gary T. Chapman, *University of California, Berkeley* (**33**, 2, p. 282) Article based on AIAA Paper 93-0436

J95-048 Dynamic Stall Control for Advanced Rotorcraft Application. Yung H. Yu, Soogab Lee, Kenneth W. McAlister, and Chee Tung, *U.S. Army Aeroflightdynamics Directorate*; and Clin M. Wang, *Georgia Institute of Technology* (**33**, 2, p. 289) Article

J95-049 Laser Ion Time-of-Flight Velocity Measurements Using N_2^+ Tracers. James M. Ress, Gabriel Laufer, and Roland H. Krauss, *University of Virginia* (**33**, 2, p. 296) Article based on AIAA Paper 94-0497

J95-050 Aeroservoelastic Aspects of Wing/Control Surface Planform Shape Optimization. Eli Livne and Wei-Lin Li, *University of Washington* (**33**, 2, p. 302) Article

J95-051 Compressive Buckling of Rectangular Composite Plates with a Free-Edge Delamination. Hiroshi Suemasu, Katsuhisa Gozu, and Kunio Hayashi, *Sophia University, Japan*; and Takashi Ishikawa, *National Aerospace Laboratory, Japan* (**33**, 2, p. 312) Article

J95-052 Integral Equation Formulation for Transient Structural Synthesis. Joshua H. Gordis, *U.S. Naval Postgraduate School* (**33**, 2, p. 320) Article

J95-053 Quadratic Programming Contact Formulation for Elastic Bodies Using Boundary Element Method. Srdan Šimunović, *Oak Ridge National Laboratory*; and Sunil Saigal, *Carnegie Mellon University* (**33**, 2, p. 325) Article

J95-054 Circular-Arc Inclusion at Isotropic Bimaterial Interface. C. K. Chao and M. H. Shen, *National Taiwan Institute of Technology* (**33**, 2, p. 332) Article

J95-055 Optimal Material Selection Using Branch and Bound Techniques. A. E. Sepulveda, *University of California, Los Angeles* (**33**, 2, p. 340) Article based on AIAA Paper 93-1351

J95-056 Object-Oriented Approach to Modeling and Analysis of Truss Structures. Mitsunori Miki, *Doshisha University, Japan*; and Yoshisada Murotsu, *University of Osaka Prefecture, Japan* (**33**, 2, p. 348) Article based on AIAA Paper 93-1406

J95-057 Dynamic Stability of Shallow Shells Subjected to Follower Forces. Maher N. Bismarck-Nasr, *Instituto Tecnológico de Aeronáutica, Brazil* (**33**, 2, p. 355) Article

J95-058 Field Versus Laboratory Turbulent Boundary Layers. Mohamed Gad-el-Hak, *University of Notre Dame*; and Promode R. Bandyopadhyay, *U.S. Naval Undersea Warfare Center* (**33**, 2, p. 361) Technical Note

J95-059 Weighted Least Squares Method of Grid Generation. Yih Nen Jeng and Wu Sheng Lin, *National Cheng Kung University, Taiwan, ROC* (**33**, 2, p. 364) Technical Note

J95-060 Jet Mixing Control Using Excitation from Miniature Oscillating Jets. Ganesh Raman, *NYMA Inc.*; and David Cornelius, *Stanford University* (**33**, 2, p. 365) Technical Note

J95-061 Turbulent Manipulation of Condensation at a Shock Tube's Contact Surface. Upul De Silva, Aric Gardner, and Joseph A. Johnson III, *Florida A&M University* (**33**, 2, p. 368) Technical Note

J95-062 Effects of Free End and Turbulence Intensities on Triangular Prism. T. S. Lee, *National University of Singapore* (**33**, 2, p. 370) Technical Note

J95-063 Experimental Investigation of Velocity Slip near an Arcjet Exit Plane. J. G. Liebeskind, R. K. Hanson, and M. A. Cappelli, *Stanford University* (**33**, 2, p. 373) Technical Note

J95-064 Direct Coupling of Euler Flow Equations with Plate Finite Element Structures. Guru P. Guruswamy and Chansup Byun, *NASA Ames Research Center* (**33**, 2, p. 375) Technical Note based on AIAA Paper 93-3087

J95-065 Shear Buckling of Simply Supported Skew Mindlin Plates. Y. Xiang, *University of Queensland, Australia*; C. M. Wang, *National University of Singapore*; and S. Kitipornchai, *University of Queensland, Australia* (**33**, 2, p. 377) Technical Note

J95-066 Perspective on Hypersonic Nonequilibrium Flow. H. K. Cheng, *University of Southern California*; and G. Emanuel, *University of Oklahoma* (**33**, 3, p. 385) Survey Paper

J95-067 Proposal of Constructive Algorithm and Discrete Shape Design of the Strongest Column. Ryohei Ishida and Yoshihiko Sugiyama, *University of Osaka Prefecture, Japan* (**33**, 3, p. 401) Article

J95-068 Sound Generation by Flow over a Two-Dimensional Cavity. Jay C. Hardin, *NASA Langley Research Center*; and D. Stuart Pope, *Lockheed Engineering and Sciences Company, Inc.* (**33**, 3, p. 407) Article

J95-069 Acoustic Study of B Helical Mode for Choked Axisymmetric Nozzle. Michael K. Ponton and John M. Seiner, *NASA Langley Research Center* (**33**, 3, p. 413) Article

J95-070 Simulating Waves in Flows by Runge–Kutta and Compact Difference Schemes. Sheng-Tao Yu, Kwang-Chung Hsieh, and Y.-L. Peter Tsai, *NYMA Technology, Inc.* (**33**, 3, p. 421) Article

J95-071 Structure of Supersonic Turbulent Boundary Layer After Expansion Regions. S. A. Arnette, M. Samimy, and G. S. Elliott, *Ohio State University* (**33**, 3, p. 430) Article

J95-072 Interferometric Study of Organized Motions in Turbulent Boundary Layers. S. Zhong and L. C. Squire, *University of Cambridge, England, UK* (**33**, 3, p. 439) Article based on AIAA Paper 94-2233

J95-073 Three-Dimensional Multigrid Reynolds-Averaged Navier–Stokes Solver for Unstructured Meshes. D. J. Mavriplis, *NASA Langley Research Center* (**33**, 3, p. 445) Article based on AIAA Paper 94-1878 CP946

J95-074 Supersonic Jet Mixing Enhancement Using Impingement Tones from Obstacles of Various Geometries. Ganesh Raman, *NYMA Technology, Inc.*; and Edward J. Rice, *NASA Lewis Research Center* (**33**, 3, p. 454) Article based on AIAA Paper 94-2955

J95-075 Effects of Chemistry on Blunt-Body Wake Structure. Virendra K. Dogra, *ViGYAN, Inc.*; James N. Moss and Richard G. Wilmoth, *NASA Langley Research Center*; and Jeff C. Taylor and H. A. Hassan, *North Carolina State University* (**33**, 3, p. 463) Article based on AIAA Paper 94-0352

J95-076 Summary of the Interaction of a Rotor Wake with a

Circular Cylinder. J. M. Kim and N. M. Komerath, *Georgia Institute of Technology* (**33**, 3, p. 470) Article based on AIAA Paper 93-3084

J95-077 High-Altitude Explosions and Their Magnetohydrodynamic Description. Yuri P. Raizer and Sergei T. Surzhikov, *Russian Academy of Sciences* (**33**, 3, p. 479) Article

J95-078 Magnetohydrodynamic Description of Collisionless Plasma Expansion in Upper Atmosphere. Yuri P. Raizer and Sergei T. Surzhikov, *Russian Academy of Sciences* (**33**, 3, p. 486) Article

J95-079 Characteristic-Based, Time-Dependent Maxwell Equation Solvers on a General Curvilinear Frame. J. S. Shang and Datta Gaitonde, *U.S. Air Force Wright Laboratory* (**33**, 3, p. 491) Article based on AIAA Paper 93-3178

J95-080 Effect of Concentrated Mass on Stability of Canti-levers Under Rocket Thrust. Yoshihiko Sugiyama and Jun Matsuike, *University of Osaka Prefecture, Japan*; Bong-Jo Ryu, *Taejon National University of Technology, Korea*; and Kazuo Katayama, Shigeru Kinoi, and Norio Enomoto, *Dicel Chemical Industries, Ltd., Japan* (**33**, 3, p. 499) Article based on AIAA Paper 94-1622 CP942

J95-081 Turbulence Anisotropy and Near-Wall Modeling in Predicting Three-Dimensional Shear-Flows. F. Sotiropoulos and V. C. Patel, *University of Iowa* (**33**, 3, p. 504) Article

J95-082 Design of Scaled Down Models for Stability of Laminated Plates. J. Rezaeepazhand and G. J. Simitses, *University of Cincinnati*; and J. H. Starnes Jr., *NASA Langley Research Center* (**33**, 3, p. 515) Article

J95-083 Substructure Synthesis Method for Frequency Response of Viscoelastic Structures. Duan Qian, *DeHavilland, Inc., Canada*; and Jorn S. Hansen, *University of Toronto, Canada* (**33**, 3, p. 520) Article

J95-084 Vibration and Buckling of Flexible Rotating Beams. Chris D. Eick, *Allied-Signal Aerospace Company*; and Marc P. Mignolet, *Ari-zona State University* (**33**, 3, p. 528) Article

J95-085 Bypassing Numerical Difficulties Associated with Updating Simultaneously Mass and Stiffness Matrices. François M. Hemez and Charbel Farhat, *University of Colorado* (**33**, 3, p. 539) Article

J95-086 Kelvin–Voigt vs Fractional Derivative Model as Constitutive Relations for Viscoelsatic Materials. Lloyd B. Eldred, William P. Baker, and Anthony N. Palazotto, *U.S. Air Force Institute of Technology* (**33**, 3, p. 547) Article

J95-087 Analysis of Beam Contact Problems via Optimal Control Theory. Dewey H. Hodges, *Georgia Institute of Technology*; and Robert R. Bless, *Lockheed Engineering and Sciences Company, Inc.* (**33**, 3, p. 551) Article

J95-088 Transonic Wind-Tunnel Flows About a Fully Configured Model of Aircraft. Yoko Takakura, *Tokyo Noko University, Japan*; and Satoru Ogawa and Yasuhiro Wada, *National Aerospace Laboratory, Japan* (**33**, 3, p. 557) Technical Note based on AIAA Paper 93-3022

J95-089 Experimental Study of Perturbed Laminar Wall Jet. C. Shih and S. Gogineni, *Florida A&M University and Florida State University* (**33**, 3, p. 559) Technical Note

J95-090 Numerical Investigation of Supersonic Annular Flow About Struts of Various Thicknesses. G. J. Harloff, *Sverdrup Technology, Inc.*; and K. E. Williams and F. B. Gessner, *University of Washington* (**33**, 3, p. 562) Technical Note based on AIAA Paper 93-2927

J95-091 Alleviation of Chattering in Flexible Beam Control via Piezofilm Actuator and Sensor. Seung-Bok Choi, *Inha University, Korea* (**33**, 3, p. 564) Technical Note

J95-092 Interaction of Jet Noise With a Nearby Panel Assembly. J. L. McGreevy, *Philadelphia College of Pharmacy and Science*; A. Bayliss, *Northwestern University*; and L. Maestrello, *NASA Langley Research Center* (**33**, 4, p. 577) Article

J95-093 Investigation of Supersonic Flow About Strut/End-wall Intersections in an Annular Duct. K. E. Williams, *Uni-versity of Seattle*; G. J. Harloff, *Sverdrup Technology, Inc.*; and F. B. Gessner, *University of Washington* (**33**, 4, p. 586) Article based on AIAA Paper 93-1925

J95-094 Predicting Stall and Post-Stall Behavior of Airfoils at Low Mach Numbers. Tuncer Cebeci, Hamid Hefazi, and Farzam Roknaldin, *California State University*; and Lawrence W. Carr, *NASA Ames Research Center* (**33**, 4, p. 595) Article

J95-095 Force and Moment on a Joukowski Profile in the Presence of Point Vortices. K. Streitlien and M. S. Triantafyllou, *Massachusetts Institute of Technology* (**33**, 4, p. 603) Article

J95-096 Prediction of Two-Dimensional Momentumless Wake by k-ε-γ Model. Jong Woo Ahn, *Korea Research Institute of Ships and Ocean Engineering*; and Hyung Jin Sung, *Korea Advanced Institute of Science and Technology* (**33**, 4, p. 611) Article

J95-097 Active Structural Acoustic Control of Noise Transmission Through Double Panel Systems. James P. Carneal and Chris R. Fuller, *Virginia Polytechnic Institute and State University* (**33**, 4, p. 618) Article based on AIAA Paper 93-4421 CP938

J95-098 Law of the Wall for Turbulent Flows in Pressure Gradients. P. G. Huang, *Eloret Institute*; and P. Bradshaw, *Stanford University* (**33**, 4, p. 624) Article

J95-099 Agglomeration Multigrid for the Three-Dimensional Euler Equations. V. Venkatakrishnan and D. J. Mavriplis, *NASA Langley Research Center* (**33**, 4, p. 633) Article based on AIAA Paper 94-0069

J95-100 Dynamic Unstructured Method for Flows Past Multiple Objects in Relative Motion. Kamakhya P. Singh, James C. Newman, and Oktay Baysal, *Old Dominion University* (**33**, 4, p. 641) Article based on AIAA Paper 94-0058

J95-101 Stability of a Compressible Axisymmetric Swirling Jet. Mehdi R. Khorrami, *High Technology Corporation* (**33**, 4, p. 650) Article based on AIAA Paper 91-1770

J95-102 Separated Flow Computations with the k-ε-v^2 Model. P. A. Durbin, *Stanford University* (**33**, 4, p. 659) Article

J95-103 Wind-Tunnel Tests of an Inclined Cylinder Having Helical Grooves. Thomas D. Stuart, *United States Navy*; James M. Clifton, *U.S. Naval Air Warfare Center Aircraft Division*; and Louis V. Schmidt, *U.S. Naval Postgraduate School* (**33**, 4, p. 665) Article based on AIAA Paper 93-3456 CP935

J95-104 Validation of Code Using Turbulence Model Applied to Three-Dimensional Transonic Channel. Juliette Cahen, *Société Nationale d'Etude et de Construction de Moteurs d'Aviation, France*; and Vincent Couaillier, Jean Délery, and Thierry Pot, *ONERA, France* (**33**, 4, p. 671) Article based on AIAA Paper 93-0293

J95-105 Compressible Inviscid Vortex Flow of a Sharp Edge

Delta Wing. J. M. A. Longo, *DLR, German Aerospace Research Establishment* (**33**, 4, p. 680) Article based on AIAA Paper 94-0071

J95-106 Quiet-Flow Ludwieg Tube for High-Speed Transition Research. Steven P. Schneider and Christine E. Haven, *Purdue University* (**33**, 4, p. 688) Article

J95-107 Transonic Flutter Suppression Using Active Acoustic Excitations. Pong-Jeu Lu, Dartzi Pan, and Dun-Yann Yeh, *National Cheng Kung University, Taiwan, ROC* (**33**, 4, p. 694) Article

J95-108 Matrix Fraction Approach for Finite-State Aero-dynamic Modeling. L. Morino, *Terza Università di Roma, Italy*; F. Mastroddi and R. De Troia, *University of Rome "La Sapienza", Italy*; and G. L. Ghiringhelli and P. Mantegazza, *Politecnico di Milano, Italy* (**33**, 4, p. 703) Article

J95-109 Stability of Viscoelastic Plate in Supersonic Flow Under Random Loading. Vadim D. Potapov, *Moscow State University of Means of Communication, Russia* (**33**, 4, p. 712) Article

J95-110 Stress Considerations in Reduced-Size Aeroelastic Optimization. M. Karpel and L. Brainin, *Technion—Israel Institute of Technology* (**33**, 4, p. 716) Article based on AIAA Paper 94-1480 CP942

J95-111 Torsional Actuation with Extension-Torsion Composite Coupling and a Magnetostrictive Actuator. Christopher M. Bothwell, Ramesh Chandra, and Inderjit Chopra, *University of Maryland* (**33**, 4, p. 723) Article based on AIAA Paper 94-1760 CP944

J95-112 Optimal Through-Thickness Temperature Gradients for Control of Interlaminar Stresses in Composites. Taehyoun Kim and Satya N. Atluri, *Georgia Institute of Technology* (**33**, 4, p. 730) Article

J95-113 Energy-Based Mechanical Model for Mixed Mode Failure of Laminated Composites. Seung J. Song and Anthony M. Waas, *University of Michigan* (**33**, 4, p. 739) Article

J95-114 Highly Accurate Modal Method for Calculating Eigenvector Derivatives in Viscous Damping Systems. Qing-Hua Zeng, *Nanjing University of Aeronautics and Astronautics, PRC* (**33**, 4, p. 746) Article

J95-115 Time-Marching Analysis of Fluid-Coupled Systems with Large Added Mass. F. Belanger and M. P. Païdoussis, *McGill University, Canada*; and E. de Langre, *CEA-CEN Saclay, DMT/SEMT/VIBR, France* (**33**, 4, p. 752) Article based on AIAA Paper 94-2267

J95-116 Scheme Dependence and Equivalence of Sensitivity for Nonlinear Problems. Liang-Jenq Leu and Subrata Mukherjee, *Cornell University* (**33**, 4, p. 758) Article

J95-117 Variational Principles for Ascent Shapes of Large Scientific Balloons. Frank Baginski and Sita Ramamurti, *George Washington University* (**33**, 4, p. 764) Article based on AIAA Paper 94-0516

J95-118 Computational Analysis of Buffet Alleviation in Viscous Transonic Flow over a Porous Airfoil. Mark A. Gillan, *Short Brothers, Northern Ireland, UK* (**33**, 4, p. 769) Technical Note based on AIAA Paper 93-3419 CP935

J95-119 Rise of Total Pressure in Frictional Flow. R. I. Issa, *Imperial College of Science, Technology, and Medicine, England, UK* (**33**, 4, p. 772) Technical Note

J95-120 Relationship Between Transition and Modes of Instability in High-Speed Boundary Layers. Jamal A. Masad, *High Technology Corporation* (**33**, 4, p. 774) Technical Note

J95-121 Dynamic Thermoelastic Coupling Effects in a Rod. Dan Givoli and Omri Rand, *Technion—Israel Institute of Technology* (**33**, 4, p. 776) Technical Note

J95-122 Numerical Simulation of Trailing-Edge Acoustic/Vortical Interaction. Pong-Jeu Lu, Dartzi Pan, and Dun-Yann Yeh, *National Cheng Kung University, Taiwan, ROC* (**33**, 5, p. 785) Article

J95-123 Biologically Inspired Controller for Sound Applications. James P. Carneal and Chris R. Fuller, *Virginia Polytechnic Institute and State University* (**33**, 5, p. 794) Article based on AIAA Paper 94-1785 CP944

J95-124 Reynolds Number Effects in Swept-Shock-Wave/Turbulent-Boundary-Layer Interaction. A. W. C. Leung and L. C. Squire, *Cambridge University, England, UK* (**33**, 5, p. 798) Article based on AIAA Paper 93-2937

J95-125 Skin-Friction Measurements in Three-Dimensional, Supersonic Shock-Wave/Boundary-Layer Interaction. Jeffrey L. Wideman, *University of Missouri*; James L. Brown, *NASA Ames Research Center*; John B. Miles, *University of Missouri*; and Oktay Özcan, *Istanbul Technical University, Turkey* (**33**, 5, p. 805) Article based on AIAA Paper 94-0314

J95-126 Turbulence Modeling of Confined Flow in Rotating Disk Systems. L. Elena and R. Schiestel, *Institut de Mécanique des Fluides, France* (**33**, 5, p. 812) Article

J95-127 Linear Stability of Differentially Heated Spatially Developing Layers. Omar M. Knio and Xiyan Shi, *Johns Hopkins University* (**33**, 5, p. 822) Article

J95-128 Upwind-Biased Finite-Volume Technique Solving Navier–Stokes Equations on Irregular Meshes. J. A. Essers, M. Delanaye, and P. Rogiest, *University of Liège, Belgium* (**33**, 5, p. 833) Article based on AIAA Paper 93-3377 CP933

J95-129 Strip Blowing from a Wedge at Hypersonic Speeds. A. F. Messiter, *University of Michigan*; and M. D. Matarrese, *Scaled Composites, Inc.* (**33**, 5, p. 843) Article based on AIAA Paper 91-0032

J95-130 Direct and Iterative Algorithms for the Three-Dimensional Euler Equations. K. J. Vanden, *U.S. Air Force Wright Laboratory*; and D. L. Whitfield, *Mississippi State University* (**33**, 5, p. 851) Article based on AIAA Paper 93-3378 CP933

J95-131 Fully Implicit Solution of Time-Dependent Partial Differential Equations in Arbitrary Multizone Domains. Moshe Rosenfeld, *Tel-Aviv University, Israel*; and Yuval Yassour, *Technion—Israel Institute of Technology* (**33**, 5, p. 859) Article based on AIAA Paper 94-0067

J95-132 Adaptive Grid Scheme for Vortex-Induced Boundary Layers. E. C. Adams and A. T. Conlisk, *Ohio State University*; and F. T. Smith, *University College, England, UK* (**33**, 5, p. 864) Article

J95-133 Interaction of Axisymmetric Supersonic Twin Jets. Gamal H. Moustafa, *Menoufia University, Egypt* (**33**, 5, p. 871) Article

J95-134 Near-Field Flow of Supersonic Swirling Jets. Andrew D. Cutler, Brian S. Levey, and Donna K. Kraus, *George Washington University and NASA Langley Research Center* (**33**, 5, p. 876) Article

J95-135 Link Between Flow Separation and Transition Onset.

J. A. Masad and M. R. Malik, *High Technology Corporation* (**33**, 5, p. 882) Article

J95-136 Numerical Behavior of Unsteady Waves. S. Aubert, L. Hallo, P. Ferrand, and M. Buffat, *Ecole Centrale de Lyon, France* (**33**, 5, p. 888) Article

J95-137 Free Vortex Calculations Using Analytical/Numerical Matching with Solution Pyramiding. Ronald J. Epstein and Donald B. Bliss, *Duke University* (**33**, 5, p. 894) Article

J95-138 Characterization of Nonlinear Viscoelastic Behavior Using a Dynamic Mechanical Approach. Thomas W. Strganac, Alan Letton, Debbie Flowers Payne, and Bruce A. Biskup, *Texas A&M University* (**33**, 5, p. 904) Article based on AIAA Paper 94-0641

J95-139 Failure of Tapered Composites Under Static and Fatigue Tension Loading. Michael R. Wisnom, M. I. Jones, and Weicheng Cui, *University of Bristol, England, UK* (**33**, 5, p. 911) Article

J95-140 Structural Modeling Issues in Flexible Systems. A. Suleman, V. J. Modi, and V. B. Venkayya, *U.S. Air Force Wright Laboratory* (**33**, 5, p. 919) Article

J95-141 Multiple Acceptable Solutions in Structural Model Improvement. Alex Berman (**33**, 5, p. 924) Article

J95-142 Simple Algorithm for Adaptive Refinement of Three-Dimensional Finite Element Tetrahedral Meshes. S. N. Muthukrishnan, P. S. Shiakolas, R. V. Nambiar, and K. L. Lawrence, *University of Texas at Arlington* (**33**, 5, p. 928) Article based on AIAA Paper 92-2354 CP922

J95-143 Interaction of Local and Global Nonlinearities of Elastic Rotating Structures. Udo Hänle, Dieter Dinkler, and Bernd Kröplin, *University of Stuttgart, Germany* (**33**, 5, p. 933) Article based on AIAA Paper 94-1674 CP943

J95-144 Buckling of Arbitrary Quadrilateral Anisotropic Plates. Navin Jaunky and N. F. Knight Jr., *Old Dominion University*; and D. R. Ambur, *NASA Langley Research Center* (**33**, 5, p. 938) Article

J95-145 Turbulent Drag Reduction Using Riblets on a Supercritical Airfoil at Transonic Speeds. P. R. Viswanath and R. Mukund, *National Aerospace Laboratories, India* (**33**, 5, p. 945) Technical Note

J95-146 Sensitivity of Amplification-Factor Transition Criterion for Flow over Roughness Element. Jamal A. Masad, *High Technology Corporation* (**33**, 5, p. 947) Technical Note

J95-147 Two-Dimensional Shear-Layer Entrainment and Interface-Length Measurements. Tzong H. Chen, *Systems Research Laboratories, Inc.*; and Robert D. Hancock, *U.S. Air Force Wright Laboratory* (**33**, 5, p. 949) Technical Note based on AIAA Paper 93-0382

J95-148 Wake Structure of a Cube in a Quasihomogeneous Turbulent Flow. D. D. Musselman and P. R. Slawson, *University of Waterloo, Canada* (**33**, 5, p. 951) Technical Note based on AIAA Paper 93-3076

J95-149 Attenuation Law of Planar Shock Waves Propagating Through Dust-Gas Suspensions. F. Aizik, G. Ben-Dor, T. Elperin, O. Igra, and M. Mond, *Ben-Gurion University of the Negrev, Israel*; and H. Grönig, *Reinisch-Westfälische Technische Hochschule, Germany* (**33**, 5, p. 953) Technical Note

J95-150 Interaction of a Regular Reflection with a Compressive Wedge: Analytical Solution. H. Li and G. Ben-Dor, *Ben-Gurion University of the Negev, Israel* (**33**, 5, p. 955) Technical Note

J95-151 Effect of Screen Porosity and Location on Wind-Tunnel Turbulence. G. Refai Ahmed and E. Brundrett, *University of Waterloo, Canada* (**33**, 5, p. 958) Technical Note

J95-152 Efficient Design Constraint Accounting for Mistuning Effects in Engine Rotors. Durbha V. Murthy, *University of Toledo*; and Christophe Pierre and Gísli Óttarsson, *University of Michigan* (**33**, 5, p. 960) Technical Note based on AIAA Paper 92-4711 CP9213

J95-153 Buckling of Polygonal and Circular Sandwich Plates. C. M. Wang, *National University of Singapore* (**33**, 5, p. 962) Technical Note

J95-154 Interaction of a Weak Shock with Freestream Disturbances. Zvi Rusak, Thomas E. Giddings, and Julian D. Cole, *Rensselaer Polytechnic Institute* (**33**, 6, p. 977) Article

J95-155 Integration of Navier–Stokes Equations Using Dual Time Stepping and a Multigrid Method. Andrea Arnone, *University of Florence, Italy*; and Meng-Sing Liou and Louis A. Povinelli, *NASA Lewis Research Center* (**33**, 6, p. 985) Article based on AIAA Paper 93-3361 CP933

J95-156 Staggered Upwind Method for Solving Navier–Stokes and k-ω Turbulence Model Equations. Xiaoqing Zheng and Feng Liu, *University of California, Irvine* (**33**, 6, p. 991) Article based on AIAA Paper 93-2968

J95-157 Anomalous Asymmetries in Flows Generated by Algorithms that Fail to Conserve Symmetry. Yuval Levy and Lambertus Hesselink, *Stanford University*; and David Degani, *Technion—Israel Institute of Technology* (**33**, 6, p. 999) Article based on AIAA Paper 94-2287

J95-158 Optimal Multistage Schemes for Euler Equations with Residual Smoothing. Chang-Hsien Tai and Jiann-Hwa Sheu, *Chung Cheng Institute of Technology, Taiwan, ROC*; and Bram van Leer, *University of Michigan* (**33**, 6, p. 1008) Article

J95-159 Semistructured Mesh Generation for Three-Dimensional Navier–Stokes Calculations. Stuart D. Connell and Mark E. Braaten, *General Electric Corporate R&D Center* (**33**, 6, p. 1017) Article

J95-160 Some Aspects of High-Speed Blunt Body Flow Computations with Roe Scheme. S. K. Saxena and K. Ravi, *National Aerospace Laboratories, India* (**33**, 6, p. 1025) Article based on AIAA Paper 94-1875 CP946

J95-161 Self-Excited Wire Method for the Control of Turbulent Mixing Layers. U. Vandsburger and C. Ding, *Virginia Polytechnic Institute and State University* (**33**, 6, p. 1032) Article based on AIAA Paper 93-0443

J95-162 ONERA Three-Dimensional Icing Model. T. Hedde and D. Guffond, *ONERA, France* (**33**, 6, p. 1038) Article

J95-163 Spray Impingement on a Hot Surface in Reacting Stagnation Flows. S. C. Li, P. A. Libby, and F. A. Williams, *University of California, San Diego* (**33**, 6, p. 1046) Article based on AIAA Paper 94-3281

J95-164 Flow Features of Shock-Induced Combustion Around Projectile Traveling at Hypervelocities. Akiko Matsuo and Kozo Fujii, *Institute of Space and Astronautical Science, Japan*; and Toshi Fujiwara, *Nagoya University, Japan* (**33**, 6, p. 1056) Article based on AIAA Paper 93-0451

J95-165 Vibrational Relaxation and Dissociation Behind Shock Waves Part I: Kinetic Rate Models. Igor V. Adamovich, *Ohio State University*; Sergey O. Macheret, *Princeton University*; J. William Rich, *Ohio State University*; and Charles E. Treanor, *CTSA, Inc.* (**33**, 6, p. 1064) Article

J95-166 Vibrational Relaxation and Dissociation Behind Shock Waves Part II: Master Equation Modeling. Igor V. Adamovich, *Ohio State University*; Sergey O. Macheret, *Princeton University*; J. William Rich, *Ohio State University*; and Charles E. Treanor, *CTSA, Inc.* (**33**, 6, p. 1070) Article

J95-167 Control of Streamwise Vortices Using Selective Suction. Roy Y. Myose, *Wichita State University*; and Ron F. Blackwelder, *University of California, Los Angeles* (**33**, 6, p. 1076) Article based on AIAA Paper 94-2216

J95-168 Simulation of Three-Dimensional Turbulent Flows on Unstructured Meshes. Oh Joon Kwon, *NYMA, Inc.*; and Chunill Hah, *NASA Lewis Research Center* (**33**, 6, p. 1081) Article based on AIAA Paper 94-1833 CP946

J95-169 Unsteady Unified Hypersonic/Supersonic Method for Aeroelastic Applications Including Wave/Shock Interaction. Frank R. Chavez, *University of Maryland*; and D. D. Liu, *Arizona State University* (**33**, 6, p. 1090) Article based on AIAA Paper 93-1317 CP931

J95-170 Suppression of Nonlinear Panel Flutter with Piezoelectric Actuators Using Finite Element Method. R. C. Zhou, Zhihong Lai, David Y. Xue, Jen-Kuang Huang, and Chuh Mei, *Old Dominion University* (**33**, 6, p. 1098) Article

J95-171 Impact Damage Resistance of Several Laminated Material Systems. Paul A. Lagace and Edward Wolf, *Massachusetts Institute of Technology* (**33**, 6, p. 1106) Article based on AIAA Paper 93-1524 CP931

J95-172 Thermomechanical Fatigue Life Prediction in Gas Turbine Superalloys: A Fracture Mechanics Approach. David M. Nissley, *United Technologies Corporation* (**33**, 6, p. 1114) Article

J95-173 Investigation of Natural Frequencies and Mode Shapes of Buckled Beams. A. H. Nayfeh and W. Kreider, *Virginia Polytechnic Institute and State University*; and T. J. Anderson, *Memphis State University* (**33**, 6, p. 1121) Article based on AIAA Paper 94-1683 CP943

J95-174 New Approximation for Steady-State Response of General Damped Systems. A. E. Sepulveda, *University of California, Los Angeles*; and H. L. Thomas, *VMA Engineering* (**33**, 6, p. 1127) Article

J95-175 Convergence Acceleration of a Navier–Stokes Solver for Efficient Static Aeroelastic Computations. Shigeru Obayashi and Guru P. Guruswamy, *NASA Ames Research Center* (**33**, 6, p. 1134) Article based on AIAA Paper 94-2268

J95-176 Buckling Mode Localization in Randomly Disordered Multispan Continuous Beams. Wei-Chau Xie, *University of Waterloo, Canada* (**33**, 6, p. 1142) Article

J95-177 Neuromorphic Approach to Inverse Problems in Aerodynamics. R. K. Prasanth, *Purdue University*; and Kevin W. Whitaker, *University of Alabama* (**33**, 6, p. 1150) Technical Note

J95-178 Grid Combination Method for Hyperbolic Grid Solver in Regions with Enclosed Boundaries. Yih Nen Jeng and Yi-Liang Shu, *National Cheng Kung University, Taiwan, ROC* (**33**, 6, p. 1152) Technical Note based on AIAA Paper 95-0857

J95-179 Semi-Infinite Channel Flows Past a Cylindrical Body: A Numerical Study. J.-H. Chen, *National Taiwan Ocean University, ROC* (**33**, 6, p. 1154) Technical Note based on AIAA Paper 93-3062

J95-180 Interaction of a Ribbon's Wake with a Turbulent Shear Flow. B. Chebbi and S. Tavoularis, *University of Ottawa, Canada* (**33**, 6, p. 1156) Technical Note

J95-181 Subsonic Boundary-Layer Tripping by Strip Blowing. J. A. Masad and R. Abid, *High Technology Corporation*; and A. S. Abdelnaser, *Virginia Polytechnic Institute and State University* (**33**, 6, p. 1159) Technical Note

J95-182 Actuator Placement with Failure Consideration for Static Shape Control of Truss Structures. Saburo Matunaga, *Tokyo Institute of Technology, Japan*; and Junjiro Onoda, *Institute of Space and Astronautical Science, Japan* (**33**, 6, p. 1161) Technical Note

J95-183 Zigzag Theory for Composite Laminates. X. Li and D. Liu, *Michigan State University* (**33**, 6, p. 1163) Technical Note

J95-184 Singular Optima in Geometrical Optimization of Structures. Uri Kirsch, *University of Pittsburgh* (**33**, 6, p. 1165) Technical Note

J95-185 Variants of Biconjugate Gradient Method for Compressible Navier–Stokes Solver. Herng Lin, D. Y. Yang, and Ching-Chang Chieng, *National Tsing Hua University, Taiwan, ROC* (**33**, 7, p. 1177) Article based on AIAA Paper 93-3316 CP933

J95-186 Supersonic Flux-Split Procedure for Second Moments of Turbulence. Foluso Ladeinde, *State University of New York at Stony Brook* (**33**, 7, p. 1185) Article

J95-187 Compressible Flowfield Solutions with Unstructured Grids Generated by Delaunay Triangulation. N. P. Weatherill, *University of Wales, Swansea, Wales, UK*; O. Hassan, *Computational Dynamics Research, Wales, UK*; and D. L. Marcum, *Mississippi State University* (**33**, 7, p. 1196) Article

J95-188 Viscous Airfoil Computations Using Adaptive Grid Redistribution. D. J. Hall and D. W. Zingg, *University of Toronto, Canada* (**33**, 7, p. 1205) Article based on AIAA Paper 94-2334

J95-189 Comparison of Nonequilibrium Solution Algorithms Applied to Chemically Stiff Hypersonic Flows. Grant Palmer, *NASA Ames Research Center*; and Ethiraj Venkatapathy, *Eloret Institute* (**33**, 7, p. 1211) Article

J95-190 Direct Numerical Simulation of Turbulent Transport with Uniform Wall Injection and Suction. Yasushi Sumitani and Nobuhide Kasagi, *University of Tokyo, Japan* (**33**, 7, p. 1220) Article based on AIAA Paper 93-3101

J95-191 Unstructured Grid Simulations of Spatially Evolving Supersonic Shear Layers. Choong K. Oh and Eric Loth, *University of Illinois at Urbana–Champaign* (**33**, 7, p. 1229) Article

J95-192 Control of Shock-Wave/Boundary-Layer Interactions by Bleed. W. J. Chyu, *NASA Ames Research Center*; and M. J. Rimlinger and T. I-P. Shih, *Carnegie Mellon University* (**33**, 7, p. 1239) Article based on AIAA Paper 93-3259

J95-193 High-Order Hybrid Numerical Simulations of Two-Dimensional Detonation Waves. Wei Cai, *University of North Carolina at Charlotte* (**33**, 7, p. 1248) Article

J95-194 Flow Structure on Stalled Delta Wing Subjected to Small Amplitude Pitching Oscillations. Kimberly M. Cipolla and Donald Rockwell, *Lehigh University* (**33**, 7, p. 1256) Article

J95-195 Large-Eddy Simulation of Turbulent Anisochoric Flows. C. Fureby, *Lund Institute of Technology, Sweden* (**33**, 7, p. 1263) Article

J95-196 Dynamics of the Juncture Vortex. M. Javed Khan, Anwar Ahmed, and J. Randall Trosper, *Texas A&M University* (**33**, 7, p. 1273) Article based on AIAA Paper 93-3473 CP935

J95-197 Evolution of Stationary Crossflow Vortices in Boundary Layers on Swept Wings. Ronald D. Joslin, *NASA Langley Research Center* (**33**, 7, p. 1279) Article

J95-198 Technique for Direct Measurement of Skin Friction in High Enthalpy Impulsive Scramjet Flowfields. Rodney D. W. Bowersox, *U.S. Air Force Institute of Technology*; Joseph A. Schetz, *Virginia Polytechnic Institute and State University*; Ken Chadwick, *CALSPAN Advanced Technology Center*; and Steve Deiwert, *NASA Ames Research Center* (**33**, 7, p. 1286) Article

J95-199 New Mode Tracking Methods in Aeroelastic Analysis. M. S. Eldred, *University of Michigan*; V. B. Venkayya, *U.S. Air Force Flight Dynamics Directorate*; and W. J. Anderson, *University of Michigan* (**33**, 7, p. 1292) Article

J95-200 Modeling Considerations for In-Phase Actuation of Actuators Bonded to Shell Structures. Frederic Lalande, Zaffir Chaudhry, and Craig A. Rogers, *Virginia Polytechnic Institute and State University* (**33**, 7, p. 1300) Article based on AIAA Paper 94-1779 CP944

J95-201 Power Flow and Consumption in Piezoelectrically Actuated Structures. Su-Wei Zhou and Craig A. Rogers, *Virginia Polytechnic Institute and State University* (**33**, 7, p. 1305) Article

J95-202 Pointwise Energy Release Rate in Delaminated Plates. B. V. Sankar and V. Sonik, *University of Florida* (**33**, 7, p. 1312) Article based on AIAA Paper 94-1398 CP942

J95-203 Interacting Loads in an Orthogonally Stiffened Composite Cylindrical Shell. Eric R. Johnson and Naveen Rastogi, *Virginia Polytechnic Institute and State University* (**33**, 7, p. 1319) Article based on AIAA Paper 94-1646 CP942

J95-204 Model of Transverse Plate Impact Dynamics for Design of Impact Detection Methodologies. J. K. Shaw, *Virginia Polytechnic Institute and State University*; J. S. Sirkis, *University of Maryland*; E. J. Friebele, *U.S. Naval Research Laboratory*; R. T. Jones, *University of Maryland*; and A. D. Kersey, *U.S. Naval Research Laboratory* (**33**, 7, p. 1327) Article

J95-205 Passive Damping of Truss Vibration Using Preloaded Joint Backlash. Junjiro Onoda, *Institute of Space and Astronautical Science, Japan*; Tetsuji Sano, *Toyota Motor Inc., Japan*; and Kenji Minesugi, *Institute of Space and Astronautical Science, Japan* (**33**, 7, p. 1335) Article based on AIAA Paper 93-1549 CP931

J95-206 Energy-Based Dynamic Buckling Estimates for Autonomous Dissipative Systems. C. Gantes and A. N. Kounadis, *National Technical University of Athens, Greece* (**33**, 7, p. 1342) Article

J95-207 Geometric Properties of Arbitrary Polyhedra in Terms of Face Geometry. Christopher W. S. Bruner, *U.S. Naval Air Warfare Center* (**33**, 7, p. 1350) Technical Note

J95-208 Effect of Ice on Airfoil Stall at High Reynolds Numbers. Tuncer Cebeci, *California State University, Long Beach* (**33**, 7, p. 1351) Technical Note

J95-209 Investigations of Angle Bias Errors in Laser Velocimetry Measurements. Gary A. Fleming, *ViGYAN, Inc.*; and John M. Kuhlman, *West Virginia University* (**33**, 7, p. 1352) Technical Note

J95-210 Shape Control of Plates Using Piezoceramic Elements. K. Ghosh; and R. C. Batra, *Virginia Polytechnic Institute and State University* (**33**, 7, p. 1354) Technical Note

J95-211 Thermal Stresses in Eccentrically Stiffened Composite Plates. Z. C. Xi, L. H. Yam, and T. P. Leung, *Hong Kong Polytechnic University* (**33**, 7, p. 1357) Technical Note

J95-212 Vibrations of Polar Orthotropic Laminated Shallow Spherical Shells by Godunov Method. G. Krizhevsky and Y. Stavsky, *Technion—Israel Institute of Technology* (**33**, 7, p. 1359) Technical Note based on AIAA Paper 94-1326 CP942

J95-213 Genetic-Algorithm-Based Procedure for Pretest Analysis. Claudio G. Franchi and Daniele Gallieni, *Politecnico di Milano, Italy* (**33**, 7, p. 1362) Technical Note

J95-214 Investigation of Flow at Leading and Trailing Edges of Pitching-Up Airfoil. C. Shih, L. M. Lourenco, and A. Krothapalli, *Florida A&M University and Florida State University* (**33**, 8, p. 1369) Article

J95-215 Numerical Study of Transonic Blade-Vortex Interaction. San-Yih Lin and Yan-Shin Chin, *National Cheng Kung University, Taiwan, ROC* (**33**, 8, p. 1377) Article

J95-216 Experimental Investigation of Convecting Vortex/Boundary-Layer Interactions. Michael Macrorie and Wayne R. Pauley, *Pennsylvania State University* (**33**, 8, p. 1383) Article based on AIAA Paper 93-0552

J95-217 Transition Model for High-Speed Flow. Eric S. Warren, *North Carolina State University*; Julius E. Harris, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (**33**, 8, p. 1391) Article

J95-218 Vortex Shedding and Shear-Layer Instability of Wing at Low-Reynolds Numbers. Rong F. Huang and Chih L. Lin, *National Taiwan Institute of Technology, ROC* (**33**, 8, p. 1398) Article

J95-219 Compressible Cavity Flow Oscillation due to Shear Layer Instabilities and Pressure Feedback. Xin Zhang, *University of Southampton, England, UK* (**33**, 8, p. 1404) Article

J95-220 Self-Sustained Flow Oscillation in a Ducted Combustor with Multiple Inlets. Tong-Miin Liou and Yi-Yung Wu, *National Tsing Hua University, Taiwan, ROC* (**33**, 8, p. 1412) Article

J95-221 Lower-Upper Scheme for Chemically Reacting Flow with Finite Rate Chemistry. Yiguang Ju, *Tohoku University, Japan* (**33**, 8, p. 1418) Article

J95-222 Computational Method of Second-Moment Turbulence Closures in Complex Geometries. Yong G. Lai, *CFD Research Corporation* (**33**, 8, p. 1426) Article

J95-223 Dynamic Recovery to Fully Attached Aerofoil Flow from Deep Stall. R. B. Green and R. A. McD. Galbraith, *University of Glasgow, Scotland, UK* (**33**, 8, p. 1433) Article

J95-224 Numerical Simulation of Oblique Shock-Wave/Vortex Interaction. Donald P. Rizzetta, *U.S. Air Force Wright Laboratory* (**33**, 8, p. 1441) Article based on AIAA Paper 94-2304

J95-225 Numerical Vorticity Confinement for Vortex–Solid Body Interaction Problems. Clin M. Wang, *Flow Analysis, Inc.*; and John S. Steinhoff and Yonghu Wenren, *University of Tennessee Space Institute* (**33**, 8, p. 1447) Article based on AIAA Paper 93-3343 CP933

J95-226 Modeling High-Pressure Chemical Oxygen-Iodine

Lasers. David L. Carroll, *University of Illinois at Urbana–Champaign* (**33**, 8, p. 1454) Article based on AIAA Paper 94-2431

J95-227 Radiatively Driven Hypersonic Wind Tunnel. Richard B. Miles, Garry L. Brown, Walter R. Lempert, Richard Yetter, George J. Williams Jr., and Seymour M. Bogdonoff, *Princeton University*; Douglas Natelson, *Stanford University*; and Jeffrey R. Guest, *University of Michigan* (**33**, 8, p. 1463) Article

J95-228 Interlaminar Stresses in General Laminates with Straight Free Edges. Chien-Chang Lin and Chih-Yu Hsu, *National Chung-Hsing University, Taiwan, ROC*; and Chu-Cheng Ko, *Aeronautical Research Laboratory, Taiwan, ROC* (**33**, 8, p. 1471) Article

J95-229 Minimal-Order Experimental Component Mode Synthesis: New Results and Challenges. K. F. Alvin, L. D. Peterson, and K. C. Park, *University of Colorado at Boulder* (**33**, 8, p. 1477) Article based on AIAA Paper 94-1570 CP942

J95-230 Inverse Dynamic Design Technique for Model Correction and Optimization. Mark J. Schulz and Sunil K. Thya-garajan, *North Carolina A&T State University*; and Joseph C. Slater, *Wright State University* (**33**, 8, p. 1486) Article

J95-231 Improved Integrated Structural Control Design Using Covariance Control Parameterization. J. B. Layton, *Clarkson University*; and L. D. Peterson, *University of Colorado at Boulder* (**33**, 8, p. 1492) Article

J95-232 Multimodal Optimization of Structures with Frequency Constraints. Jaroslaw A. Czyz, *Nowsco Pipeline Services, Canada*; and Stanislaw A. Lukasiewicz, *University of Calgary, Canada* (**33**, 8, p. 1496) Article

J95-233 Geometric Optimization in Presence of Contact Singularities. Jungsun Park and W. J. Anderson, *University of Michigan* (**33**, 8, p. 1503) Article

J95-234 Experimental Analysis of Surface Flow on a Delta Wing by Infrared Thermography. L. De Luca and G. Guglieri, *Politecnico di Torino, Italy*; and G. Cardone and G. M. Carlomagno, *Università di Napoli, Italy* (**33**, 8, p. 1510) Technical Note

J95-235 Prediction of Separation Bubbles Using Improved Transition Criterion with Two-Equation Turbulence Model. D. H. Choi and E. H. Lee, *Korea Advanced Institute of Science and Technology* (**33**, 8, p. 1512) Technical Note

J95-236 Two-Equation Model for Turbulent Wall Flow. Michael M. Gibson and Adil A. Dafa'Alla, *Imperial College of Science, Technology, and Medicine, England, UK* (**33**, 8, p. 1514) Technical Note

J95-237 Computation of Compression Ramp Flow with a Cross-Diffusion Modified k-ε Model. Byong Kuk Yoon and Myung Kyoon Chung, *Korea Advanced Institute of Science and Technology* (**33**, 8, p. 1518) Technical Note

J95-238 Active Control of Boundary-Layer Instabilities: Use of Sensors and Spectral Controller. R. D. Joslin, R. A. Nicolaides, G. Erlebacher, M. Y. Hussaini, and M. D. Gunzburger, *NASA Langley Research Center* (**33**, 8, p. 1521) Technical Note

J95-239 Application of Similarity in Hypersonic Transition Prediction. Alexander V. Fedorov and Norman D. Malmuth, *Rockwell International Science Center* (**33**, 8, p. 1523) Technical Note

J95-240 Vortex Development over Flat Plate Riblets in a Transitioning Boundary Layer. J. A. Rothenflue and P. I. King, *U.S. Air Force Institute of Technology* (**33**, 8, p. 1525) Technical Note

J95-241 Magnitude of Artificial Dissipation for Numerical Simulations. Y. Kallinderis and H. McMorris, *University of Texas at Austin* (**33**, 8, p. 1526) Technical Note

J95-242 New Method for the Eduction of Natural Coherent Structures. S. Aydöre and P. J. Disimile, *University of Cincinnati* (**33**, 8, p. 1529) Technical Note

J95-243 Shrinkage Flow Effects on the Convective Stability of NH_4Cl-H_20 Directional Solidification. J. A. Hopkins, T. D. McCay, and M. H. McCay, *University of Tennessee Space Institute* (**33**, 8, p. 1531) Technical Note based on AIAA Paper 93-0261

J95-244 Evaluating the Temporal Accuracy of Inlet Normal Shock Propagation Simulations. Gerald C. Paynter, *Boeing Commercial Airplane Group*; and David W. Mayer, *Boeing Defense and Space Group* (**33**, 8, p. 1534) Technical Note

J95-245 Unsteady Adaptive Wall Models for Wind-Tunnel Testing. Byeong-Hee Chang and Bongzoo Sung, *Korea Aerospace Research Institute*; and Keun-Shik Chang, *Korea Advanced Institute of Science and Technology* (**33**, 8, p. 1536) Technical Note

J95-246 Shock Oscillation in a Two-Dimensional, Flexible-Wall Nozzle. Shen-Min Liang, Chou-Jiu Tsai, and Fan-Ming Yu, *National Cheng Kung University, Taiwan, ROC* (**33**, 8, p. 1538) Technical Note

J95-247 Effect of Transverse Shear on Aeroelastic Stability of a Composite Rotor Blade. Sung Nam Jung, *Chonbuk National University, Korea*; and Seung Jo Kim, *Seoul National University, Korea* (**33**, 8, p. 1541) Technical Note

J95-248 Effects of Boundary Conditions on Postbuckling of Compressed, Symmetrically Laminated Thick Plates. Erasmo Carrera and Michele Villani, *Politecnico di Torino, Italy* (**33**, 8, p. 1543) Technical Note

J95-249 Deflection Control During Dynamic Deformations of a Rectangular Plate Using Piezoceramic Elements. R. C. Batra, *Virginia Polytechnic Institute and State University*; and K. Ghosh (**33**, 8, p. 1547) Technical Note

J95-250 Effective Transverse Young's Modulus of Composites with Viscoelastic Interphase. Sung Yi, Gerry D. Pollock, M. Fouad Ahmad, and Harry H. Hilton, *University of Illinois at Urbana–Champaign* (**33**, 8, p. 1549) Technical Note

J95-251 Submodeling Approach to Adaptive Mesh Refinement. John O. Dow, *University of Colorado at Boulder*; and Matthew J. Sandor, *Storage Technology Corporation* (**33**, 8, p. 1550) Technical Note

J95-252 Numerical/Experimental Study of a Wingtip Vortex in the Near Field. Jennifer Dacles-Mariani and Gregory G. Zilliac, *NASA Ames Research Center*; and Jim S. Chow and Peter Bradshaw, *Stanford University* (**33**, 9, p. 1561) Article

J95-253 Whirl Speeds and Stability of Rotating Shaft Subjected to End Loads. Lien-Wen Chen and Hwang-Kuen Chen, *National Cheng Kung University, Taiwan, ROC* (**33**, 9, p. 1569) Article

J95-254 Parameter Estimation for Weibull Probability Distribution Function of Initial Fatigue Quality. Andrea Pieracci, *University of Pisa, Italy* (**33**, 9, p. 1574) Article

J95-255 Sound Propagation Simulations Using Lattice Gas Methods. Yasushi Sudo and Victor W. Sparrow, *Pennsylvania State University* (**33**, 9, p. 1582) Article based on AIAA Paper 93-4404

J95-256 Panel Dynamic Response to a Reverberant Acoustic Field. H. Nelisse, O. Beslin, and J. Nicolas, *University of Sherbrooke, Canada* (**33**, 9, p. 1590) Article

J95-257 Experimental Testing of Diffusion Models in a Manipulated Turbulent Boundary Layer. J. Lemay, *Université Laval, Canada*; and J. P. Bonnet and J. Delville, *Centre d'Etudes Aérodynamiques et Thermiques, France* (**33**, 9, p. 1597) Article based on AIAA Paper 94-2348

J95-258 Sensitivity Analysis of Unsteady Aerodynamic Loads in Cascades. Christopher B. Lorence and Kenneth C. Hall, *Duke University* (**33**, 9, p. 1604) Article based on AIAA Paper 94-0064

J95-259 Pressure-Based Control-Volume Finite Element Method for Flow at All Speeds. S. M. H. Karimian and G. E. Schneider, *University of Waterloo, Canada* (**33**, 9, p. 1611) Article based on AIAA Paper 94-1960

J95-260 Unstructured Grid Generation Using Iterative Point Insertion and Local Reconnection. David L. Marcum, *Mississippi State University*; and Nigel P. Weatherill, *University of Wales, Swansea, Wales, UK* (**33**, 9, p. 1619) Article based on AIAA Paper 94-1926 CP946

J95-261 Numerical Study of Hypersonic Leeward Flow over a Blunt Nosed Delta Wing. E. R. Mallett and D. I. Pullin, *California Institute of Technology*; and M. N. Macrossan, *University of Queensland, Australia* (**33**, 9, p. 1626) Article

J95-262 Turbulent Flow in Supersonic and Hypersonic Nozzles. Jiasen Hu and Arthur Rizzi, *Royal Institute of Technology, Sweden* (**33**, 9, p. 1634) Article

J95-263 Use of Streamwise Vorticity to Increase Mass Entrainment in a Cylindrical Ejector. M. J. Carletti and C. B. Rogers, *Tufts University*; and D. E. Parekh, *McDonnell Douglas Aerospace* (**33**, 9, p. 1641) Article based on AIAA Paper 93-3247

J95-264 Simulation of Overexpanded Low-Density Nozzle Plume Flow. Chan-Hong Chung, *NASA Lewis Research Center*; Kenneth J. De Witt, *University of Toledo*; and Robert M. Stubbs and Paul F. Penko, *NASA Lewis Research Center* (**33**, 9, p. 1646) Article based on AIAA Paper 94-0357

J95-265 Influence of Pressure Waves on the Initial Development of an Explosion Kernel. A. C. McIntosh, *University of Leeds, England, UK* (**33**, 9, p. 1651) Article based on AIAA Paper 94-0104

J95-266 Panel Method Formulation for Oscillating Airfoils in Supersonic Flow. Paulo A. O. Soviero, *Instituto Tecnológico de Aeronáutica, Brazil*; and Renato S. Ribeiro, *Embraer–Empresa Brasileira de Aeronáutica S.A., Brazil* (**33**, 9, p. 1659) Article based on AIAA Paper 94-1891 CP946

J95-267 Perpendicular Blade Vortex Interaction. Kenneth S. Wittmer, William J. Devenport, and Michael C. Rife, *Virginia Polytechnic Institute and State University*; and Stewart A. L. Glegg, *Florida Atlantic University* (**33**, 9, p. 1667) Article based on AIAA Paper 94-0526

J95-268 Differential Laser Interferometer for Nanometer Displacement Measurements. C.-K. Lee, *National Taiwan University, ROC*; and T.-W. Wu, *IBM Almaden Research Center* (**33**, 9, p. 1675) Article

J95-269 Fourier Solution to Higher Order Theory Based Laminated Shell Boundary-Value Problem. Reaz A. Chaudhuri, *University of Utah*; and Humayun R. H. Kabir, *University of Kuwait* (**33**, 9, p. 1681) Article

J95-270 Stochastic Modeling of Fracture Processes in Fiber Reinforced Composites. S. P. Yushanov, *Latvian University*; and S. P. Joshi, *University of Texas at Arlington* (**33**, 9, p. 1689) Article

J95-271 Distributed Transfer Function Method for Analysis of Cylindrical Shells. Jianping Zhou and Bingen Yang, *University of Southern California* (**33**, 9, p. 1698) Article

J95-272 Structural/Control System Optimization with Variable Actuator Masses. Ik Min Jin, *Korea Aerospace Research Institute*; and Abdon E. Sepulveda, *University of California, Los Angeles* (**33**, 9, p. 1709) Article based on AIAA Paper 93-1473 CP931

J95-273 Methods for Finding Feasible Points in Constrained Optimization. Ossama A. Elwakeil and Jasbir S. Arora, *University of Iowa* (**33**, 9, p. 1715) Article

J95-274 Improved Two-Point Function Approximations for Design Optimization. Liping Wang and Ramana V. Grandhi, *Wright State University* (**33**, 9, p. 1720) Article

J95-275 Buckling and Postbuckling of Spherical Shells with Apical Cutout Under Ring Load. Ming-Chyuan Lin and Meng-Kao Yeh, *National Tsing Hua University, Taiwan, ROC* (**33**, 9, p. 1728) Article

J95-276 Calculated Effect of Freestream Turbulence on Aerodynamic Characteristics of a Delta Wing. Joachim Pollak and C. Edward Lan, *University of Kansas* (**33**, 9, p. 1734) Technical Note

J95-277 Transparent Acoustic Source Condition Applied to the Euler Equations. Chang-Jeon Hwang and Duck-Joo Lee, *Korea Advanced Institute of Science and Technology* (**33**, 9, p. 1736) Technical Note

J95-278 Nonequilibrium Anisotropic Eddy–Viscosity/Diffusivity Turbulence Model for Heated Turbulent Flows. Wenyan Ni, John G. Kawall, and James F. Keffer, *University of Toronto, Canada* (**33**, 9, p. 1738) Technical Note

J95-279 Shock Wave/Vortex Interaction in a Flow over 90-deg Sharp Corner. Naoki Uchiyama and Osamu Inoue, *Tohoku University, Japan* (**33**, 9, p. 1740) Technical Note

J95-280 Active Control of Vortex Breakdown over a Delta Wing. I. Gursul, S. Srinivas, and G. Batta, *University of Cincinnati* (**33**, 9, p. 1743) Technical Note

J95-281 Pin-Force and Euler-Bernoulli Models for Analysis of Intelligent Structures. Giulio Strambi, Renato Barboni, and Paolo Gaudenzi, *University of Rome "La Sapienza", Italy* (**33**, 9, p. 1746) Technical Note

J95-282 Computation of Eigenvector Derivatives with Repeated Eigenvalues Using a Complete Modal Space. De-Wen Zhang, *Beijing Institute of Structure and Environment, PRC*; and Fu-Shang Wei, *Kaman Aerospace Corporation* (**33**, 9, p. 1749) Technical Note

J95-283 Measurements of Supersonic Wing Tip Vortices. Michael K. Smart, Iraj M. Kalkhoran, and James Bentson, *Polytechnic University* (**33**, 10, p. 1761) Article based on AIAA Paper 94-2576

J95-284 Computational Model of Flexible Membrane Wings in Steady Laminar Flow. Richard Smith and Wei Shyy, *University of Florida* (**33**, 10, p. 1769) Article

J95-285 Perspective on Computational Fluid Dynamics Validation. Joseph G. Marvin, *NASA Ames Research Center* (**33**, 10, p. 1778) Survey Paper based on AIAA Paper 93-0002

J95-286 Computational Aeroacoustics: Issues and Methods. Christopher K. W. Tam, *Florida State University* (**33**, 10, p. 1788) Article based on AIAA Paper 95-0677

J95-287 Two-Dimensional Weak Shock-Vortex Interaction in a Mixing Zone. L. Guichard, L. Vervisch, and P. Domingo, *Institut National des Sciences Appliquées de Rouen, France* (**33**, 10, p. 1797) Article based on AIAA Paper 95-0877

J95-288 Numerical Investigation of Dynamic Stall of an Os-cillating Wing. J. A. Ekaterinaris, *NASA Ames Research Center* (**33**, 10, p. 1803) Article based on AIAA Paper 95-0781

J95-289 Advance in Overset Grid Schemes: From Chimera to DRAGON Grids. Kai-Hsiung Kao and Meng-Seng Liou, *NASA Lewis Research Center* (**33**, 10, p. 1809) Article

J95-290 Coarse Grid Correction Scheme for Implicit Multiblock Euler Calculations. Carl B. Jenssen, *SINTEF—Foundation for Scientific and Industrial Research, Norway*; and Per Å. Weinerfelt, *Linköping University, Sweden* (**33**, 10, p. 1816) Article based on AIAA Paper 95-0225

J95-291 Multigrid Acceleration of an Upwind Euler Solver on Unstructured Meshes. Carl F. Ollivier-Gooch, *National Research Council* (**33**, 10, p. 1822) Article

J95-292 Computational Study of Large-Disturbance Oscillations in Unsteady Supersonic Combustion Around Projectiles. Akiko Matsuo and Kozo Fujii, *Institute of Space and Astronautical Science, Japan* (**33**, 10, p. 1828) Article based on AIAA Paper 94-0764

J95-293 Nonequilibrium-Dissociated Stagnation Boundary-Layer Flow on an Arbitrarily Catalytic Swept Wing. George R. Inger, *Iowa State University* (**33**, 10, p. 1836) Article based on AIAA Paper 94-2072

J95-294 Reduction of Fluctuating Pressure Loads in Shock/Boundary-Layer Interactions Using Vortex Generators. J. W. Barter and D. S. Dolling, *University of Texas at Austin* (**33**, 10, p. 1842) Article

J95-295 Axisymmetric Oscillations of an Opposing Jet from a Hemispherical Nose. Masahiro Fujita, *Tokyo University, Japan* (**33**, 10, p. 1850) Article based on AIAA Paper 94-0659

J95-296 Sensitivity Study of Turbulent Reacting Flow Modeling in Gas Turbine Combustors. Xue-Song Bai and Laszlo Fuchs, *Royal Institute of Technology, Sweden* (**33**, 10, p. 1857) Article based on AIAA Paper 94-0782

J95-297 Matrix Dissipation for Central Difference Schemes with Combustion. P. Gerlinger, J. Algermissen, and D. Brüggemann, *University of Stuttgart, Germany* (**33**, 10, p. 1865) Article based on AIAA Paper 94-3181

J95-298 Surface Pressure Measurements on a Pitching Swept Wing in a Water Channel. April Patterson, *U.S. Army Corps of Engineers*; and Paul Rymarz and B. R. Ramaprian, *Washington State University* (**33**, 10, p. 1871) Article based on AIAA Paper 94-2254

J95-299 Analysis and Quantification of a Solid-State Laser Doppler Anemometer. C. McLean and C. Camci, *Pennsylvania State University* (**33**, 10, p. 1880) Article

J95-300 Engineering Application of Experimental Uncertainty Analysis. Hugh W. Coleman, *University of Alabama in Huntsville*; and W. Glenn Steele, *Mississippi State University* (**33**, 10, p. 1888) Article

J95-301 Optimal Design of Composite Lifting Surface for Flutter Suppression with Piezoelectric Actuators. Changho Nam, *Hankuk Aviation University, Korea*; and Youdan Kim, *Seoul National University, Korea* (**33**, 10, p. 1897) Article

J95-302 Free Vibration Analysis of Anisotropic Thin-Walled Closed-Section Beams. Erian A. Armanios, *Georgia Institute of Technology*; and Ashraf M. Badir, *Clark Atlanta University* (**33**, 10, p. 1905) Article

J95-303 Free Vibration of Delaminated Composite Sandwich Beams. Jian Shiun Hu, *National Center for High-Performance Computing, Taiwan, ROC*; and Chyanbin Hwu, *National Cheng Kung University, Taiwan, ROC* (**33**, 10, p. 1911) Article

J95-304 Low-Speed Impact Damage-Initiation Characteristics of Selected Laminated Composite Plates. Damodar R. Ambur and James H. Starnes Jr., *NASA Langley Research Center*; and Chunchu B. Prasad, *Analytical Services and Materials, Inc.* (**33**, 10, p. 1919) Article

J95-305 Mode Tracking Issues in Structural Optimization. M. S. Eldred, *University of Michigan*; V. B. Venkayya, *U.S. Army Aeroflightdynamics Directorate*; and W. J. Anderson, *University of Michigan* (**33**, 10, p. 1926) Article

J95-306 Direct Strain Measure for Large-Deformation Analyses of Beam Structures. Jin Mitsugi, *NTT Radio Communication Systems Laboratories, Japan* (**33**, 10, p. 1934) Article

J95-307 Object-Oriented Optimization of Discrete Structures. Mitsunori Miki, *Doshisha University, Japan* (**33**, 10, p. 1940) Article based on AIAA Paper 94-1595 CP942

J95-308 Buckling of Thick Orthotropic Cylindrical Shells Under Combined External Pressure and Axial Compression. G. A. Kardomateas and M. S. Philobos, *Georgia Institute of Technology* (**33**, 10, p. 1946) Article

J95-309 Dynamic Interactive Buckling of Ring Stiffened Composite Shells. Andrea Schokker, Akihito Kasagi, and Srinivasan Sridharan, *Washington University* (**33**, 10, p. 1954) Article

J95-310 Postbuckling of Laminated Composites with Delaminations. Jaehong Lee, Zafer Gürdal, and O. Hayden Griffin Jr., *Virginia Polytechnic Institute and State University* (**33**, 10, p. 1963) Article

J95-311 Analysis of the Baldwin–Barth and Spalart–Allmaras One-Equation Turbulence Models. Vijay A. Sai and Frederick M. Lutfy, *University of Southern California* (**33**, 10, p. 1971) Technical Note

J95-312 Near-Wall Integration of Reynolds Stress Turbulence Closures with No Wall Damping. Charles G. Speziale, *Boston University*; and Ridha Abid, *High Technology Corporation* (**33**, 10, p. 1974) Technical Note

J95-313 Hypersonic Shockwave/Turbulent Boundary-Layer Interactions on a Porous Surface. Rebecca L. Hanna, *North Carolina State University* (**33**, 10, p. 1977) Technical Note based on AIAA Paper 95-0005

J95-314 Computation of Transonic Flows with Shock-Induced Separation Using Algebraic Turbulence Models. S. K. Chakrabartty and K. Dhanalakshmi, *National Aerospace Laboratories, India* (**33**, 10, p. 1979) Technical Note

J95-315 Determination of Starting Shock Velocity in Supersonic Wind Tunnel. Peter J. Disimile, *University of Cincinnati*; and Norman Toy, *University of Surrey, England, UK* (**33**, 10, p. 1981) Technical Note

J95-316 Sensitivity of Flutter Response of a Wing to Shape and Modal Parameters. Jason Cherian Issac and Rakesh K. Kapania, *Virginia Polytechnic Institute and State University*; and Jean-François M. Barthelemy, *NASA Langley Research Center* (**33**, 10, p. 1983) Technical Note

J95-317 Thermally Induced Vibration of a Symmetric Cross-Ply Plate with Hygrothermal Effects. Habib Eslami and Stephen Maerz, *Embry–Riddle Aeronautical University* (**33**, 10, p. 1986) Technical Note

J95-318 Analytical Approach to Free Vibration of Sandwich Plates. S. Mirza and N. Li, *University of Ottawa, Canada* (**33**, 10, p. 1988) Technical Note

J95-319 New Evolutionary Direction Operator for Genetic Algorithms. Kenji Yamamoto and Osamu Inoue, *Tohoku University, Japan* (**33**, 10, p. 1990) Technical Note

J95-320 Quick Optimum Buckling Design of Axially Compressed, Fiber Composite Cylindrical Shells. Rolf Zimmermann, *DLR, German Aerospace Research Establishment* (**33**, 10, p. 1993) Technical Note based on AIAA Paper 94-4366

J95-321 Experimental Research on Blunt Trailing-Edge Airfoil Sections at Low Reynolds Numbers. Junzo Sato and Yasuto Sunada, *University of Tokyo, Japan* (**33**, 11, p. 2001) Article

J95-322 Evaluation of Boundary Conditions for Computational Aeroacoustics. R. Hixon, S.-H. Shih, and Reda R. Mankbadi, *NASA Lewis Research Center* (**33**, 11, p. 2006) Article

J95-323 Behavior of Pressure and Heat Transfer in Sharp Fin-Induced Turbulent Interactions. P. E. Rodi and D. S. Dolling, *University of Texas at Austin* (**33**, 11, p. 2013) Article

J95-324 Effects of Mean Flow Three Dimensionality on Turbulent Boundary-Layer Structure. John K. Eaton, *Stanford University* (**33**, 11, p. 2020) Article based on AIAA Paper 94-2225

J95-325 Prediction of Nonequilibrium Turbulent Flows with Explicit Algebraic Stress Models. Ridha Abid, *High Technology Corporation*; and Christopher Rumsey and Thomas Gatski, *NASA Langley Research Center* (**33**, 11, p. 2026) Article

J95-326 Three-Dimensional Boundary-Layer Transition on a Swept Wing at Mach 3.5. L. N. Cattafesta III, *High Technology Corporation*; V. Iyer, *ViGYAN, Inc.*; J. A. Masad, *High Technology Corporation*; and R. A. King and J. R. Dagenhart, *NASA Langley Research Center* (**33**, 11, p. 2032) Article based on AIAA Paper 94-2375

J95-327 Behavior of Linear Reconstruction Techniques on Unstructured Meshes. Michael Aftosmis, Datta Gaitonde, and T. Sean Tavares, *U.S. Air Force Wright Aeronautical Laboratories* (**33**, 11, p. 2038) Article

J95-328 Preconditioning Applied to Variable and Constant Density Flows. Jonathan M. Weiss and Wayne A. Smith, *Fluent, Inc.* (**33**, 11, p. 2050) Article based on AIAA Paper 94-2209

J95-329 Error Estimator and Adaptive Moving Grids for Finite Volumes Schemes. A. Ilinca, R. Camarero, J. Y. Trépanier, and M. Reggio, *École Polytechnique de Montréal, Canada* (**33**, 11, p. 2058) Article based on AIAA Paper 95-0669

J95-330 Comparison of Implicit Schemes for the Incompressible Navier–Stokes Equations. Stuart E. Rogers, *NASA Ames Research Center* (**33**, 11, p. 2066) Article based on AIAA Paper 95-0567

J95-331 Multigrid Algorithm for Three-Dimensional Incompressible High-Reynolds Number Turbulent Flows. Chunhua Sheng, Lafayette K. Taylor, and David L. Whitfield, *Mississippi State University* (**33**, 11, p. 2073) Article based on AIAA Paper 94-2335

J95-332 New Similarity Solutions for Hypersonic Boundary Layers with Applications to Inlet Flows. George R. Inger, *Iowa State University* (**33**, 11, p. 2080) Article based on AIAA Paper 94-2351

J95-333 Comparison of High-Resolution Schemes Applied to Flows Containing Strong Shocks. K. Sundar, V. Sriramulu, and M. Ramakrishna, *Indian Institute of Technology* (**33**, 11, p. 2087) Article

J95-334 Experimental and Theoretical Study of Wide-Angle Diffuser Flow with Screens. Matthias M. Seltsam, *DLR, German Aerospace Research Establishment* (**33**, 11, p. 2092) Article based on AIAA Paper 94-2510

J95-335 Measurements of Compressible Turbulent Flow Structure in a Supersonic Mixing Layer. Rodney D. W. Bowersox, *U.S. Air Force Institute of Technology*; and Joseph A. Schetz, *Virginia Polytechnic Institute and State University* (**33**, 11, p. 2101) Article

J95-336 Experimental Study of Three-Dimensional Separation on a Large-Scale Model. D. Barberis and P. Molton, *ONERA, France* (**33**, 11, p. 2107) Article based on AIAA Paper 93-3007

J95-337 Criterion for the Detachment of Laminar and Turbulent Boundary Layers. M. Sajben and Y. Liao, *University of Cincinnati* (**33**, 11, p. 2114) Article based on AIAA Paper 95-2152

J95-338 Computed Effects of Heat Transfer on the Transonic Flow over an Aerofoil. S. Raghunathan and D. Mitchell, *Queens University, Northern Ireland, UK* (**33**, 11, p. 2120) Article

J95-339 Dynamics of Experimentally Simulated Microbursts. Abbas Alahyari and Ellen K. Longmire, *University of Minnesota* (**33**, 11, p. 2128) Article

J95-340 Effect of Shock Strength on Oblique Shock-Wave/Vortex Interaction. Michael K. Smart and Iraj M. Kalkhoran, *Polytechnic University* (**33**, 11, p. 2137) Article based on AIAA Paper 95-0098

J95-341 Buffeting of Fin: Distortion of Incident Vortex. S. Canbazoglu, J.-C. Lin, S. Wolfe, and D. Rockwell, *Lehigh University* (**33**, 11, p. 2144) Article

J95-342 Quantification of Aero-Optical Phase Distortion Using the Small-Aperture Beam Technique. Eric J. Jumper and Ronald J. Hugo, *University of Notre Dame* (**33**, 11, p. 2151) Article based on AIAA Paper 92-3020

J95-343 Hartmann Wave Front Sensor Studies of Dynamic Organized Structure in Flowfields. L. McMackin, B. Masson, and N. Clark, *Phillips Laboratory*; and K. Bishop, R. Pierson, and E. Chen, *Applied Technology Associates, Inc.* (**33**, 11, p. 2158) Article based on AIAA Paper 94-2548

J95-344 Shape Memory Ceramic Actuation of Adaptive Structures. Kamyar Ghandi and Nesbitt W. Hagood, *Massachusetts Institute of Technology* (**33**, 11, p. 2165) Article

J95-345 Full and von Kármán Geometrically Nonlinear Analyses of Laminated Cylindrical Panels. Deokjoo Kim and Reaz A. Chaudhuri, *University of Utah* (**33**, 11, p. 2173) Article

J95-346 Model Correlation Using Multiple Static Load and Vi-

bration Tests. D. C. Zimmerman and T. Simmermacher, *University of Houston* (**33**, 11, p. 2182) Article

J95-347 Using Transfer Function Parameter Changes for Damage Detection of Structures. Jiann-Shiun Lew, *Tennessee State University* (**33**, 11, p. 2189) Article

J95-348 Hybrid Parallel Computation of Transcendental Structural Eigenvalues. David Kennedy, W. John Watkins, and Fred W. Williams, *University of Wales, Wales, UK* (**33**, 11, p. 2194) Article based on AIAA Paper 94-1349 CP942

J95-349 Estimation of System Matrices by Dynamic Condensation and Application to Structural Modification. S. Y. Chen and Y. G. Tsuei, *National Cheng Kung University, Taiwan, ROC* (**33**, 11, p. 2199) Article

J95-350 Shape Design for Thin-Walled Beam Cross Sections Using Rational *B* Splines. Uwe Schramm and Walter D. Pilkey, *University of Virginia*; and Richard I. DeVries and Mark P. Zebrowski, *Ford Motor Company* (**33**, 11, p. 2205) Article based on AIAA Paper 94-4392

J95-351 Variable-Complexity Genetic Algorithm for Topological Design. P. J. Gage, I. M. Kroo, and I. P. Sobieski, *Stanford University* (**33**, 11, p. 2212) Article based on AIAA Paper 94-4413 CP9413

J95-352 Asymmetric Elastic Buckling of Axially Compressed Conical Shells with Various End Conditions. N. Pariatmono, *BPP Teknologi, Indonesia*; and M. K. Chryssanthopoulos, *Imperial College, England, UK* (**33**, 11, p. 2218) Article

J95-353 Alternative Solution of the Kernel Function in Subsonic Unsteady Lifting Surface Theory. Ronald J. Epstein and Donald B. Bliss, *Duke University* (**33**, 11, p. 2228) Technical Note

J95-354 Starting Point of Curvature for Reflected Diffracted Shock Wave. R. S. Srivastava, *Defence Science Center, India* (**33**, 11, p. 2230) Technical Note

J95-355 Buffeting of Fins: An Assessment of Surface Pressure Loading. S. Wolfe, *Lehigh University*; S. Canbazoglu, *Ercyes University, Turkey*; and J.-C. Lin and D. Rockwell, *Lehigh University* (**33**, 11, p. 2232) Technical Note

J95-356 Flow Visualization Using Natural Condensation of Water Vapor. Michael Brendel (**33**, 11, p. 2234) Technical Note

J95-357 Asymmetric Crossing-Shock-Wave/Turbulent-Boundary-Layer Interaction. Doyle D. Knight, *Rutgers University*; T. J. Garrison and G. S. Settles, *Pennsylvania State University*; A. A. Zheltovodov, A. I. Maksimov, A. M. Shevchenko, and S. S. Vorontsov, *Institute of Theoretical and Applied Mechanics, Russia* (**33**, 12, p. 2241) Article

J95-358 Structure of a Turbulent Double-Fin Interaction at Mach 4. Datta Gaitonde and J. S. Shang, *U.S. Air Force Wright Laboratory* (**33**, 12, p. 2250) Article

J95-359 In-Flight Imaging of Transverse Gas Jets Injected into Compressible Crossflows. K. C. Wang, O. I. Smith, and A. R. Karagozian, *University of California, Los Angeles* (**33**, 12, p. 2259) Article

J95-360 Nonreflecting Boundary Conditions for Jet Flow Computations. M. Ehtesham Hayder and Eli Turkel, *NASA Lewis Research Center* (**33**, 12, p. 2264) Article

J95-361 Toward the Direct Calculation of Noise: Fluid/Acoustic Coupled Simulation. K. Viswanathan, *Lockheed Martin Aeronautical Systems*; and L. N. Sankar, *Georgia Institute of Technology* (**33**, 12, p. 2271) Article

J95-362 Thermoacoustic Oscillations in Combustion Chambers of Gas Turbines. Jakob J. Keller, *University of Washington* (**33**, 12, p. 2280) Article

J95-363 Experimental Study of Saddle Point of Attachment in Laminar Juncture Flow. Michael D. Coon and Murray Tobak, *NASA Ames Research Center* (**33**, 12, p. 2288) Article based on AIAA Paper 95-0785

J95-364 Viscous Interaction Phenomena in Hypersonic Wedge Flow. Luigi de Luca and Gennaro Cardone, *University of Naples "Federico II", Italy*; and Dominique Aymer de la Chevalerie and Alain Fonteneau, *Centre National de la Recherche Scientifique, France* (**33**, 12, p. 2293) Article

J95-365 Cell-Vertex Adaptive Euler Method for Cascade Flows. L. A. Catalano, P. De Palma, M. Napolitano, and G. Pascazio, *Politecnico di Bari, Italy* (**33**, 12, p. 2299) Article based on AIAA Paper 94-0076

J95-366 Multigrid Approach to Overset Grid Communication. Rudy A. Johnson and Dave M. Belk, *U.S. Air Force Wright Laboratory* (**33**, 12, p. 2305) Article based on AIAA Paper 93-0769

J95-367 Euler-Based Inverse Method for Turbomachine Blades Part 1: Two-Dimensional Cascades. T. Dang and V. Isgro, *Syracuse University* (**33**, 12, p. 2309) Article

J95-368 Rarefied Gas Flow Simulation Based on Quasigasdynamic Equations. T. G. Elizarova and I. A. Graur, *Russian Academy of Sciences*; and J. C. Lengrand and A. Chpoun, *Centre National de la Recherche Scientifique, France* (**33**, 12, p. 2316) Article

J95-369 Unified Turbulence Closure Model for Axisymmetric and Planar Free Shear Flows. David F. Robinson, *North Carolina State University*; Julius E. Harris, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (**33**, 12, p. 2325) Article based on AIAA Paper 95-0360

J95-370 Compressibility Effects and Mixing Enhancement in Turbulent Free Shear Flows. Tong-Miin Liou, Wan-Yih Lien, and Po-Wen Hwang, *National Tsing Hua University, Taiwan, ROC* (**33**, 12, p. 2332) Article

J95-371 Large Eddy Simulation of Reacting Flows Applied to Bluff Body Stabilized Flames. C. Fureby and S.-I. Möller, *Lund Institute of Technology, Sweden* (**33**, 12, p. 2339) Article

J95-372 Aeroelastic Analysis of Multibladed Hingeless Rotors in Hover. Maeng Hyo Cho and In Lee, *Korea Advanced Institute of Science and Technology* (**33**, 12, p. 2348) Article

J95-373 Elastic-Plastic Orthotropic Multilayered Pipe Deformation Under External Load and Internal Pressure. Milos Kojic, Nenad Grujovic, Radovan Slavkovic, and Aleksandar Kojic, *University of Kragujevac, Serbia, Yugoslavia* (**33**, 12, p. 2354) Article

J95-374 Hierarchical Bending Analysis of Cord-Rubber Composites. R. M. V. Pidaparti, *Purdue University at Indianapolis* (**33**, 12, p. 2359) Article

J95-375 Fuzzy Finite Element Approach for the Analysis of Imprecisely Defined Systems. S. S. Rao and James P. Sawyer, *Purdue University* (**33**, 12, p. 2364) Article

J95-376 Modal Analysis Using Segmented Piezoelectric Sensors. J. Callahan and H. Baruh, *Rutgers University* (**33**, 12, p. 2371) Article

J95-377 Application of the Finite Element Method to Postbuckling Analysis of Laminated Plates. Le-Chung Shiau and Teng-Yuan Wu, *National Cheng Kung University, Taiwan, ROC* (**33**, 12, p. 2379) Article

J95-378 Parallel Processing in Optimal Structural Design Using Simulated Annealing. Mir M. Atiqullah and S. S. Rao, *Purdue University* (**33**, 12, p. 2386) Article

J95-379 Structural Optimization of Guyed Trusses. N. Stander and J. E. Coster, *University of Pretoria, South Africa* (**33**, 12, p. 2393) Article

J95-380 Shape Optimization with *p* Adaptivity. Raviprakash R. Salagame and Ashok D. Belegundu, *Pennsylvania State University* (**33**, 12, p. 2399) Article

J95-381 Buckling of Rectangular Symmetric Angle-Ply Laminated Plates Determined by Eigensensitivity Analysis. O. Barton Jr., *U.S. Naval Academy*; and R. Reiss, *Howard University* (**33**, 12, p. 2406) Article based on AIAA Paper 94-1574 CP942

J95-382 Buckling Analysis of General Triangular Anisotropic Plates Using Polynomials. Navin Jaunky and Norman F. Knight Jr., *Old Dominion University*; and Damodar R. Ambur, *NASA Langley Research Center* (**33**, 12, p. 2414) Article based on AIAA Paper 95-1456 CP952

J95-383 Vortex Characteristics over Delta Wing Subject to Transient Along-Core Blowing. Cheng-Hsiung Kuo and Ni-Yu Lu, *National Chung-Hsing University, Taiwan, ROC* (**33**, 12, p. 2418) Technical Note

J95-384 Conjugate Gradient Squared Algorithm for Panel Methods. Santhosh P. Koruthu, *Aeronautical Development Agency, India* (**33**, 12, p. 2420) Technical Note

J95-385 Correct Limit Approximations for Planar, Cylindrical, and Spherical Blast Waves. Qifeng Zhu, Wataru Masuda, and Kiyoshi Yatsui, *Nagaoka University of Technology, Japan* (**33**, 12, p. 2422) Technical Note

J95-386 Observations of a Planar Jet Subjected to Large-Amplitude, Low-Frequency Disturbances. Robert B. Farrington and Scott D. Claunch, *National Renewable Energy Laboratory* (**33**, 12, p. 2424) Technical Note

J95-387 Transverse Vorticity Observations in Large Coherent Structures. Peter J. Disimile, *University of Cincinnati* (**33**, 12, p. 2427) Technical Note

J95-388 Wide Angle Light Scattering in Shock-Laser Interaction. J. Panda, *University of Toledo* (**33**, 12, p. 2429) Technical Note

J95-389 Shock Detection Technique Based on Light Scattering by Shock. J. Panda, *University of Toledo* (**33**, 12, p. 2431) Technical Note

J95-390 Stress and Failure Analysis for Cross-Plied Curved Composite Laminates. Naoyuki Watanabe, *Tokyo Metropolitan Institute of Technology, Japan*; and Takao Okada, *National Aerospace Laboratory, Japan* (**33**, 12, p. 2433) Technical Note based on AIAA Paper 93-1519 CP931

J95-391 Analysis of Thick Multilayered Anisotropic Plates by a Higher Order Plate Element. Marco Di Sciuva and Ugo Icardi, *Politecnico di Torino, Italy* (**33**, 12, p. 2435) Technical Note

J95-392 Ribbed Cylindrical Shells Under a Concentrated Transverse Load. Sıddık Şener, *Gazi University, Turkey* (**33**, 12, p. 2437) Technical Note

J95-393 Extraction of Free-Free Modes Using Constrained Test Data. Ouqi Zhang and Aspasia Zerva, *Drexel University* (**33**, 12, p. 2440) Technical Note

J95-394 Effect of General Sparse Matrix Algorithm on Optimization of Space Structures. Kamal C. Sarma and Hojjat Adeli, *Ohio State University* (**33**, 12, p. 2442) Technical Note

Books Reviewed During 1995

Shock Dynamics, by Z. Han and X. Yin, *Kluwer Academic Publishers* (**33**, 1, p. 186); reviewed by Gabi Ben-Dor.

Recent Research Advances in the Fluid Mechanics of Turbulent Jets and Plumes, edited by P. A. Davies and M. J. Valente Neves, *Kluwer Academic Publishers* (**33**, 1, p. 186); reviewed by W. Douglas Baines.

Incompressible Computational Fluid Dynamics, edited by M. D. Gunzburger and R. A. Nicolaides, *Cambridge University Press* (**33**, 2, p. 379); reviewed by J. M. Barton.

Combustion in High Speed Flows, edited by J. Buckmaster, T. L. Jackson, and A. Kumar, *Kluwer Academic Publishers* (**33**, 3, p. 571); reviewed by P. M. Rubins.

Transonic Vortical Gas Flows, by E. G. Shifrin and O. M. Belotserkovskii, *J. Wiley* (**33**, 4, p. 779); reviewed by Julian D. Cole.

Shock Wave Engine Design, by Helmut E. Weber, *J. Wiley* (**33**, 5, p. 970); reviewed by J. A. C. Kentfield.
Errata (**33**, 8, p. 1556)

Formulas for Stress, Strain and Structural Matrices, by Walter D. Pilkey, *J. Wiley* (**33**, 5, p. 970); reviewed by Anthony N. Palazotto.

Bubble Dynamics and Interface Phenomena, edited by J. R. Blake, J. M. Boulton-Stone, and N. H. Thomas, *Kluwer Academic Publishers* (**33**, 8, p. 1555); reviewed by Edwin P. Rood.

Acoustic and Elastic Wave Scattering Using Boundary Elements, by J. J. do Rego Silva, *Computational Mechanics Publications* (**33**, 9, p. 1755); reviewed by F. Farassat.

Interaction of Shock Waves, by R. S. Srivastava, *Kluwer Academic Publishers* (**33**, 9, p. 1756); reviewed by Gabi Ben-Dor.

Stories from a 20th-Century Life, by William R. Sears, *Parabolic Press* (**33**, 10, p. 1996); reviewed by Gino Moretti.
